

# RESTAURANTS & FOODSERVICE

*Front of House*

*Kitchen and Bar Areas*

Whether it's a restaurant kitchen or dining room, bar or lounge, freezer or cold storage, restroom or foyer, ProREZ can design and specify the right seamless floor coating solution for the space.

*The ProREZ™ Advantage... Innovation beneath your feet.*

**You imagine it, and we'll design it.**

*Beneath the feet, you can redefine your space with attractive, hardwearing, and hygienic seamless coating and resurfacing systems. At ProREZ, we understand the “recipe” of diverse factors — like heavy traffic patterns, exposures to foodstuffs and microbes, heat, wetness and chemicals, aggressive cleaning and sanitization regimens, strict safety inspections, multi-purpose uses — that need to be carefully considered in today’s bustling restaurant and foodservice operations. With this in mind, we offer a solid, dependable line of protective and decorative seamless floor coating finishes built to perform and to keep looking great long after they’re installed.*

**SPECIAL ATTENTION**

In order to make the restaurant and foodservice environment more appealing to its diverse personnel, customers, and visitors, it is important that the seamless floor coating is very durable, provides a reliably safe surface, and is aesthetically pleasing and complementary to the overall design, décor, and atmosphere found in these dynamic and multi-purpose settings. No one system does it all. ProREZ engineers, customizes, and specifies highly dependable floor coating, resurfacing, and integral cove base systems for a wide array of restaurant and foodservice spaces that are long-lasting and simple to maintain — reducing maintenance, repairs, and overall life-cycle costs.

Medium Duty Decorative Quartz Systems (1/16"-1/8"): [ProQuartz](#) | [ProCryl CQ](#)

Medium Duty Decorative Flake Systems (1/16"-1/8"): [ProFlake](#) | [ProCryl CF](#)

Medium Duty Decorative Metallic Systems (1/16"): [ProLumina](#)

### Hygienic and Safe

The seamless, non-porous, waterproof, protective flooring finishes in these particular settings need to be pristine, microbe-free and compliant eliminating areas where dirt and bacteria may become problematic. Balancing slip resistance with ease of cleaning & sanitizing, the ProREZ seamless surface ensures safety under foot for personnel, customers, and visitors meeting or exceeding local, state, and federal requirements.

### Low Odor, Fast Setting Materials

Busy restaurant and foodservice facilities operating long hours cannot afford the expensive downtime or hazardous, tainting odors. Maintaining indoor air quality with low-odor materials and offering quicker installations and turn-around times for repairs, refurbishments, or new installations without seriously disrupting operational schedules are real ProREZ benefits.

### Long-Term Value in Protection and Performance

The value of the floor coating is ultimately derived from the relationship of its overall cost and maintenance to its long-term performance and durability. ProREZ engineers carefully assess each space considering its unique environmental, functional, aesthetic, and budgetary requirements.

### Customizable Finishes

ProREZ designs and specifies aesthetically pleasing, industrial strength flooring systems that are available in a wide selection of standard and custom colors, blends, patterns, and textures to distinctively complement any new or existing facility. Custom design accents including special borders, insignias and other custom floor markings can be integrated to enhance your facility's space and atmosphere with a truly unique finish.
