# Fire Stick Installation

To set up your Amazon Fire TV Stick, follow these steps:

1. Plug the Fire TV Stick into your TV's HDMI port and connect the power adapter.
2. Insert batteries into the Fire TV Stick remote.
3. Follow the on-screen instructions to complete the setup.
4. Once set up, load your Fire TV Stick to stream content from Stream4less. Follow the instruction below to get the Stream4less content setup on your Fire Stick
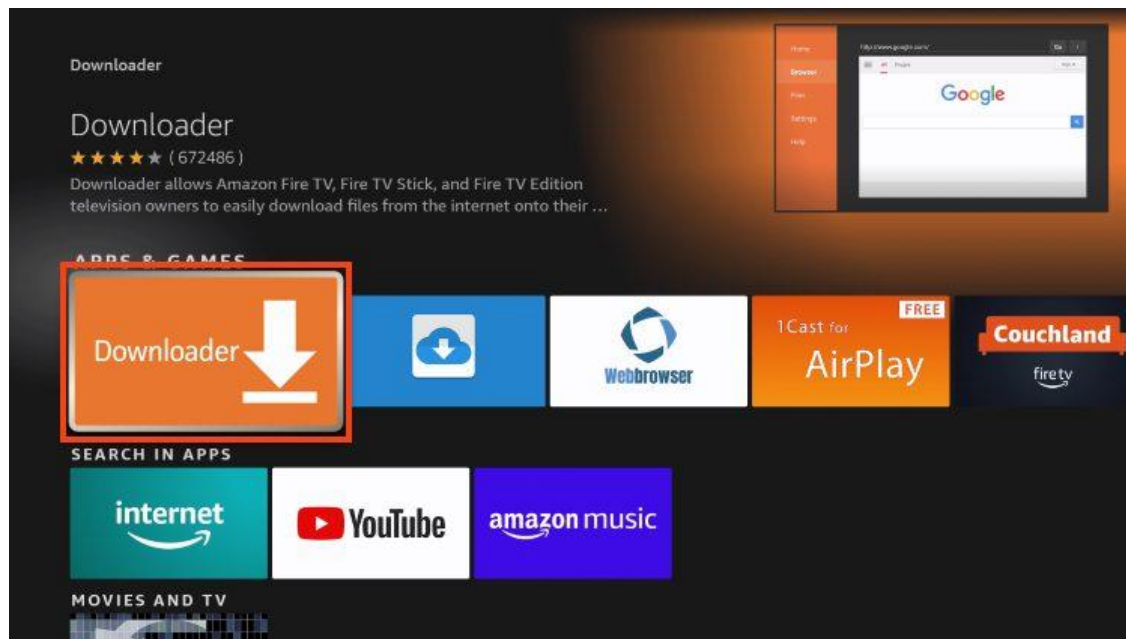

Step 1: Install the Downloader App

**1.** Open the search bar on your device.

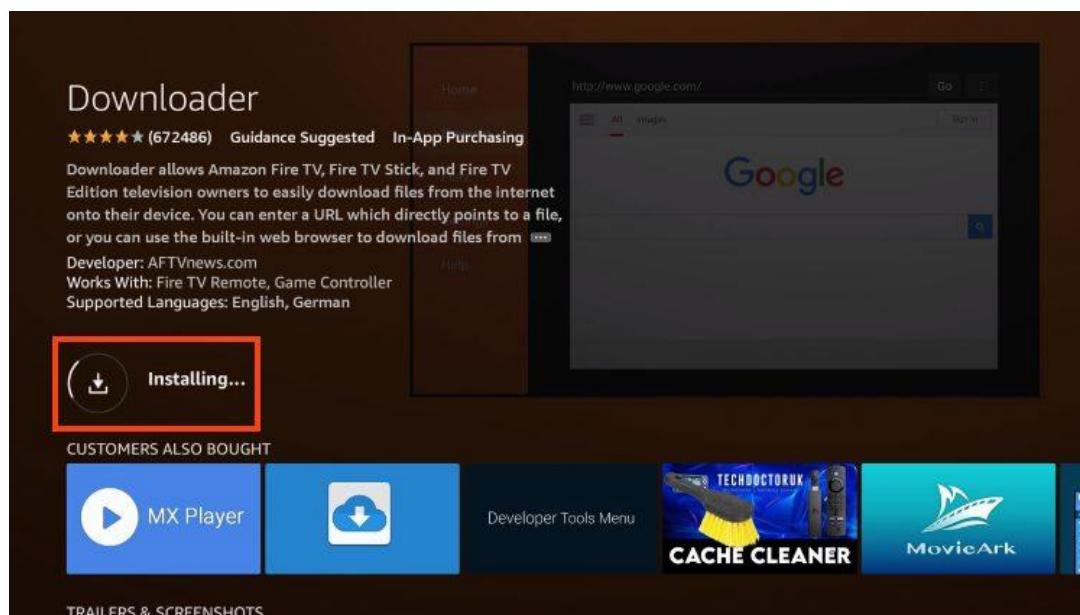

2. Type Downloader.

**3.** Select the Downloader app as pictured below.

4. If you have previously installed this, choose Download. If this is your first time, choose Get.

5. Downloader will begin to install.

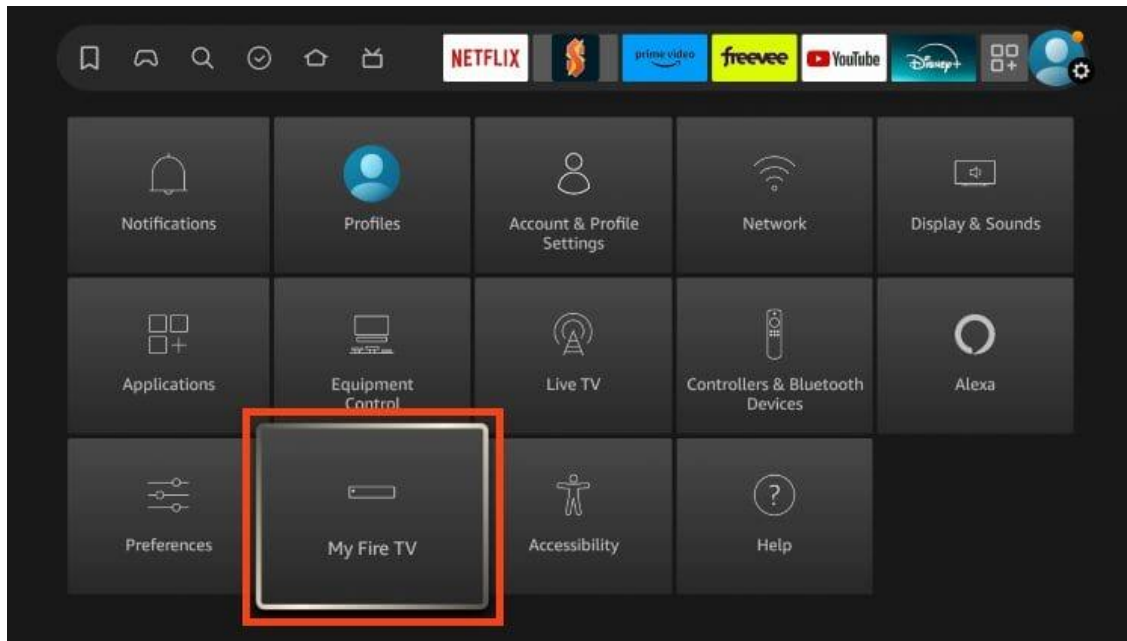

6. When it has finished, you will get a notification in the lower right hand corner.

8. Before continuing, you must enable Unknown Apps within the Settings of your device if you haven't already turned this ON.
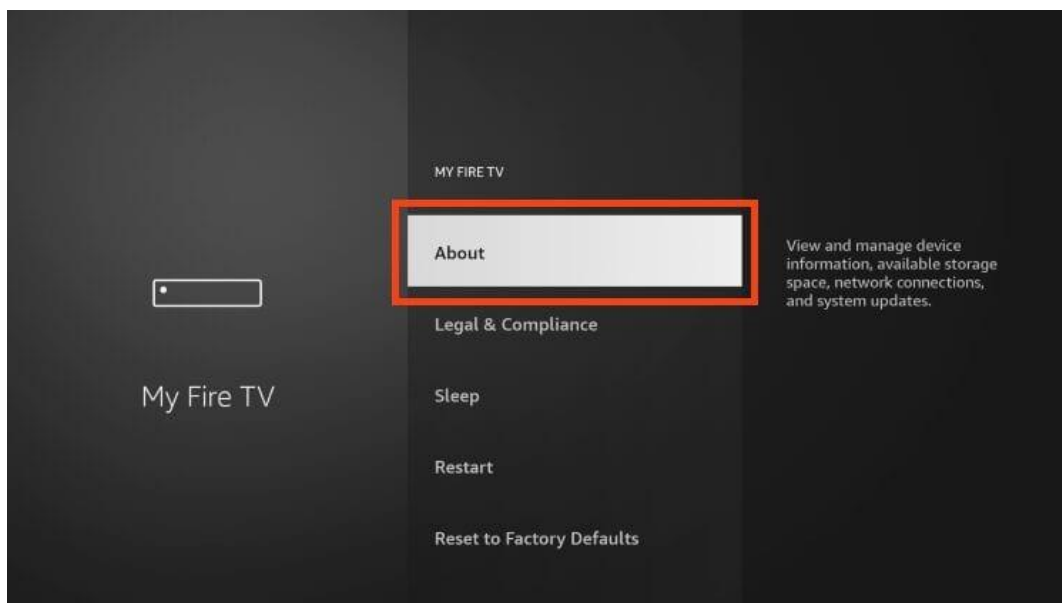

How to Enable Developer Options on Firestick & Fire TV

**1.** Hover over the Settings icon and click **My Fire TV**.

2. Click **About**.
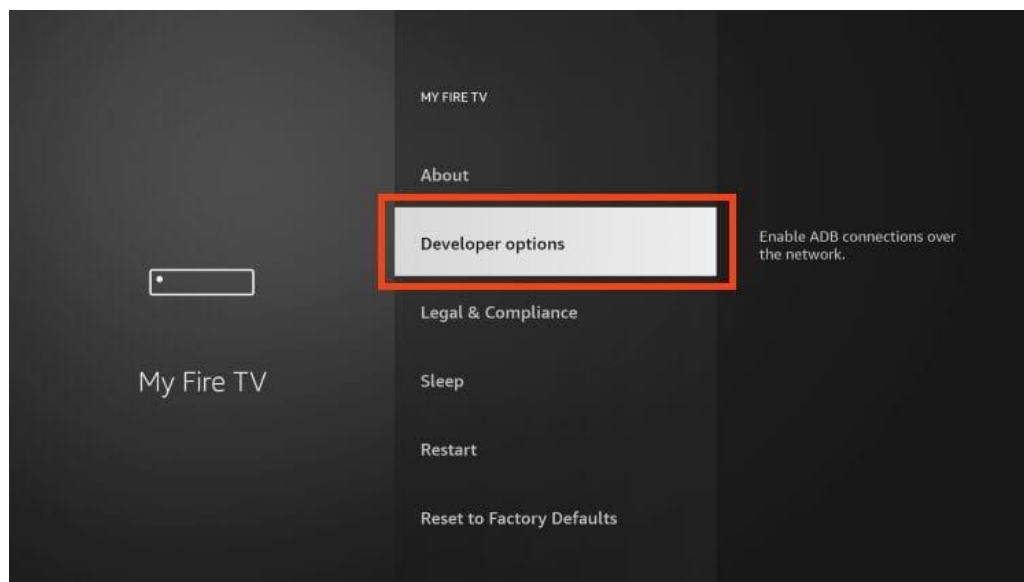

Note: Notice Developer Options is missing.

3. Hover over **Fire TV Stick 4K Max** or whatever your device is and click the OK button on your remote **7 times** to become a developer.

You will then encounter a message at the bottom of your screen stating "No need, you are already a developer."

5. Click the back button on your remote and you will notice Developer Options is now showing within My Fire TV.

**6.** Select Developer options and then Install unknown apps.
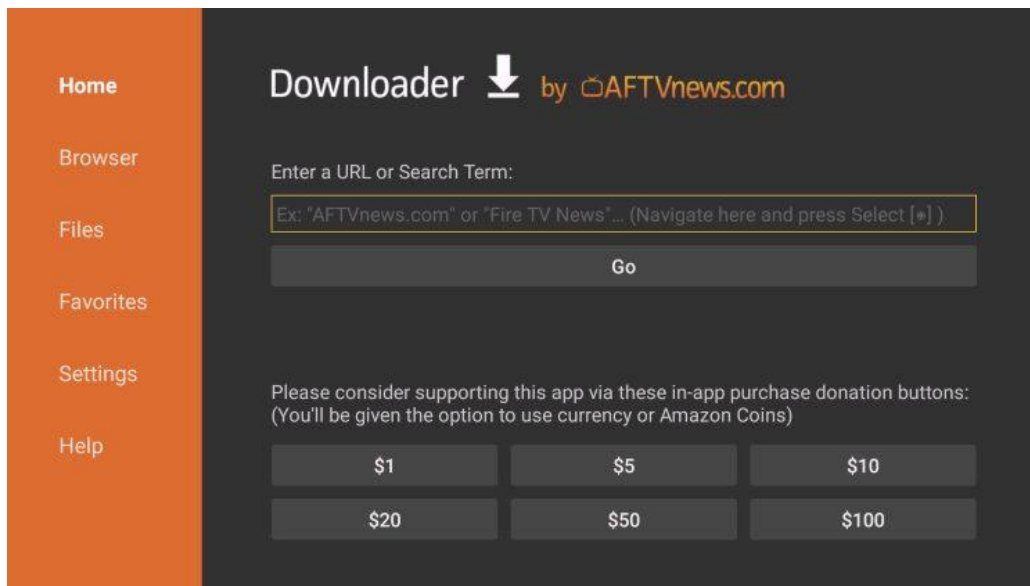

6. Turn Downloader on.

With Downloader installed and enabled for Unknown Apps, we can continue with the installation of IPTV Smarters.
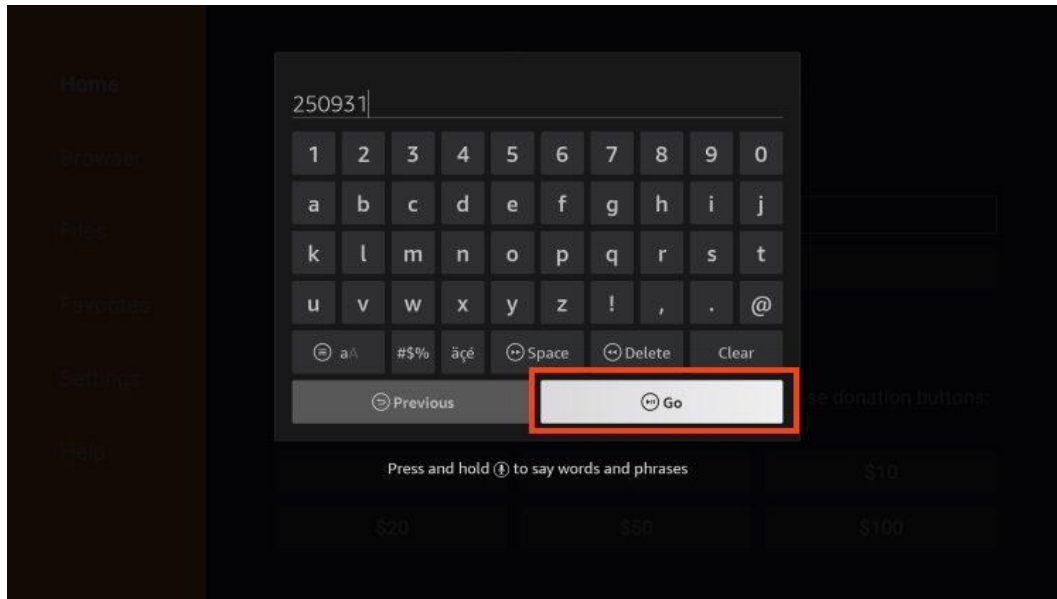

Step 2: Install IPTV Smarters Pro APK

1. Launch Downloader under recently installed apps.

**2.** Click the URL Menu bar which will launch the keyboard.

3. Now, type **250931** and click Go. *This is the official [Downloader Code](#) for the popular TROYPOINT Toolbox.
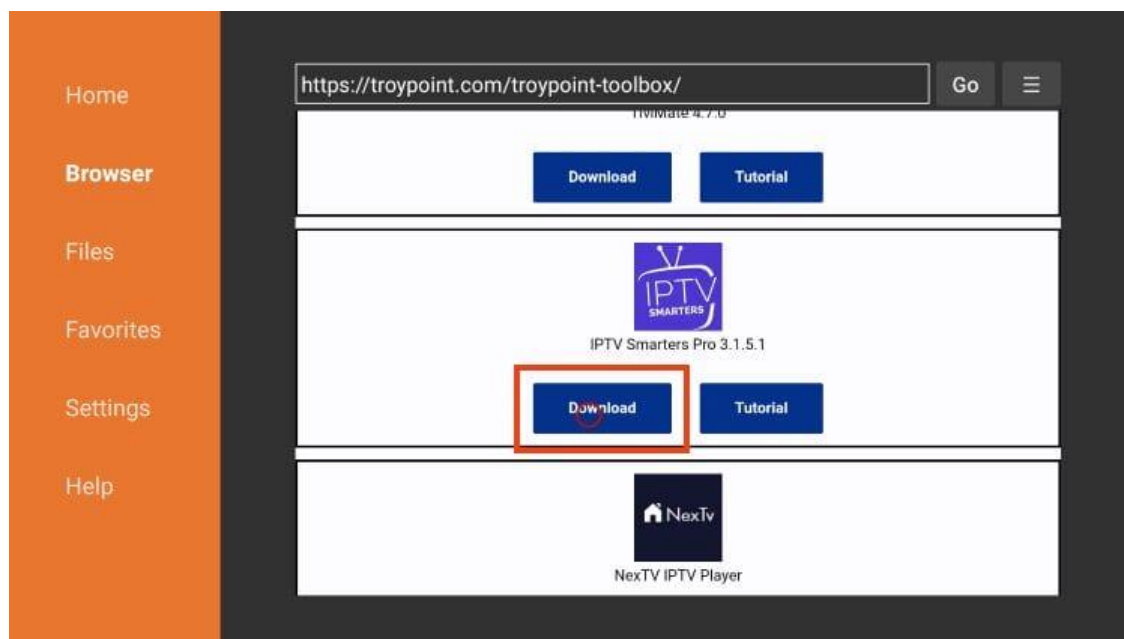

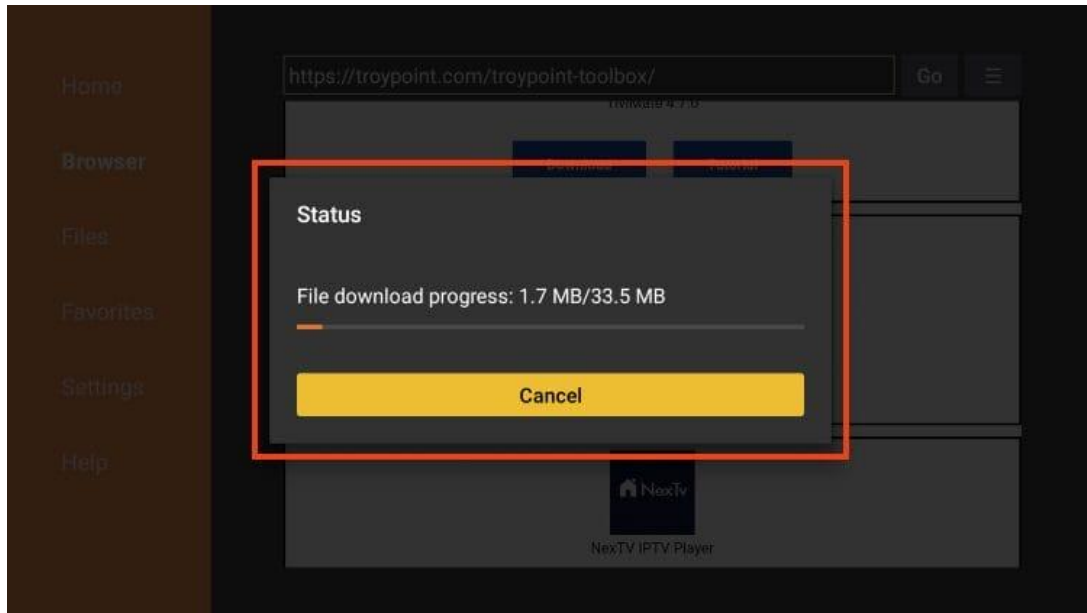

4. Wait for the page to load.

5. You are now presented with the home screen of the TROYPOINT Toolbox which features tons of popular apps and tools for installation.
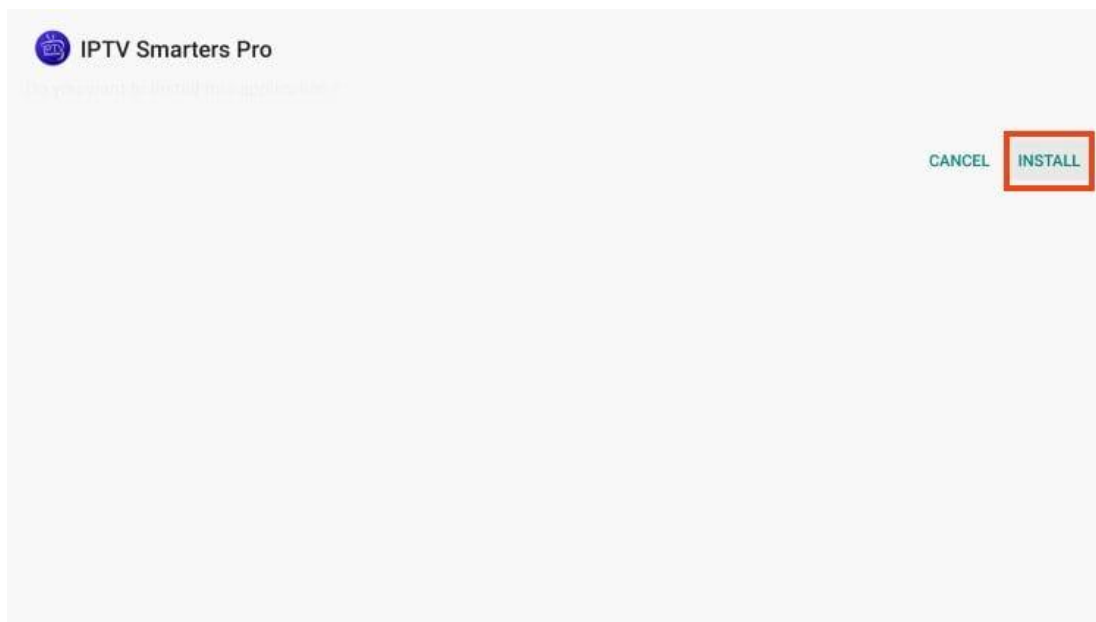

**6.** Scroll down to find IPTV Smarters Pro and choose Download.

**7.** Wait while the app downloads.

8. Select Install.

9. Choose Done.

10. You are then prompted to delete the installation file. This will free up space on your device. Click Delete.

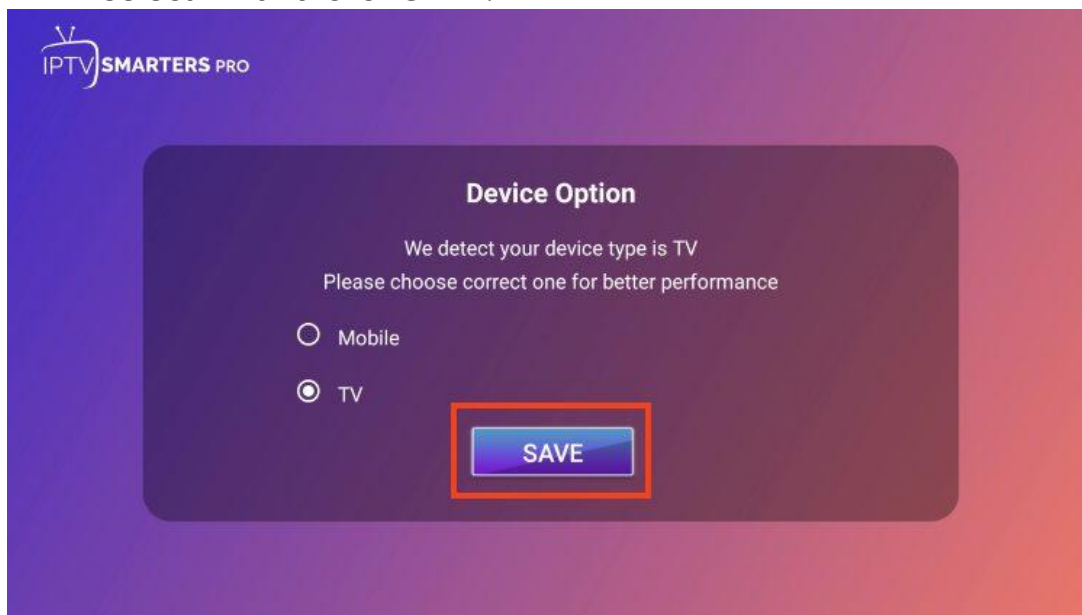

11. Choose Delete again.

Installation is now complete.

How to Set Up IPTV Smarters

After installing, you may launch the application for use. First, you are prompted to select your layout.
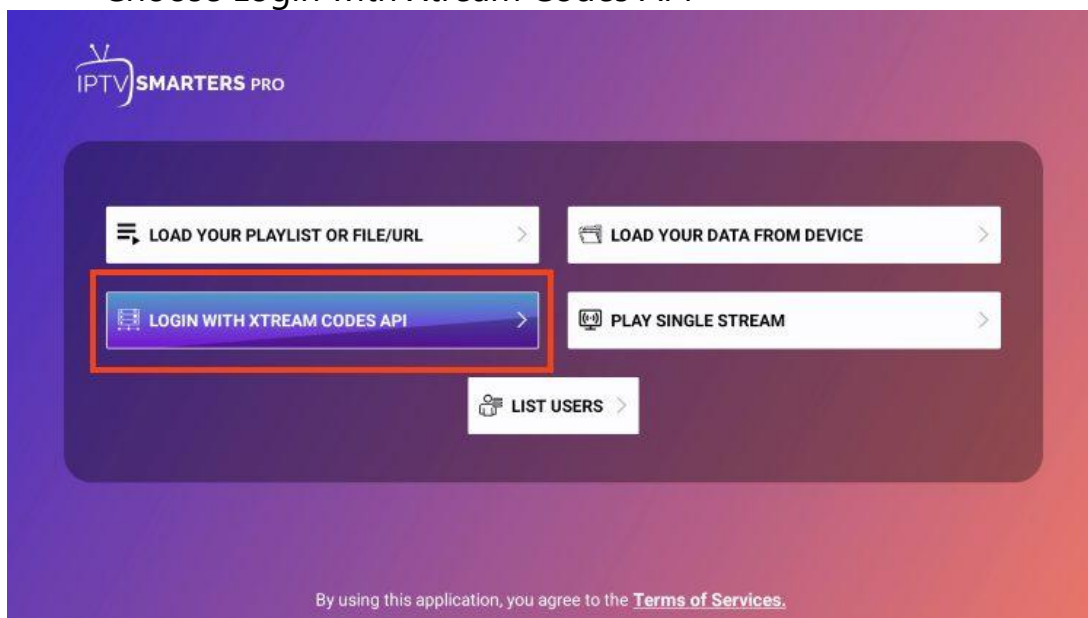

- If using a streaming device such as Firestick or Android TV/Google TV, select TV and click SAVE.
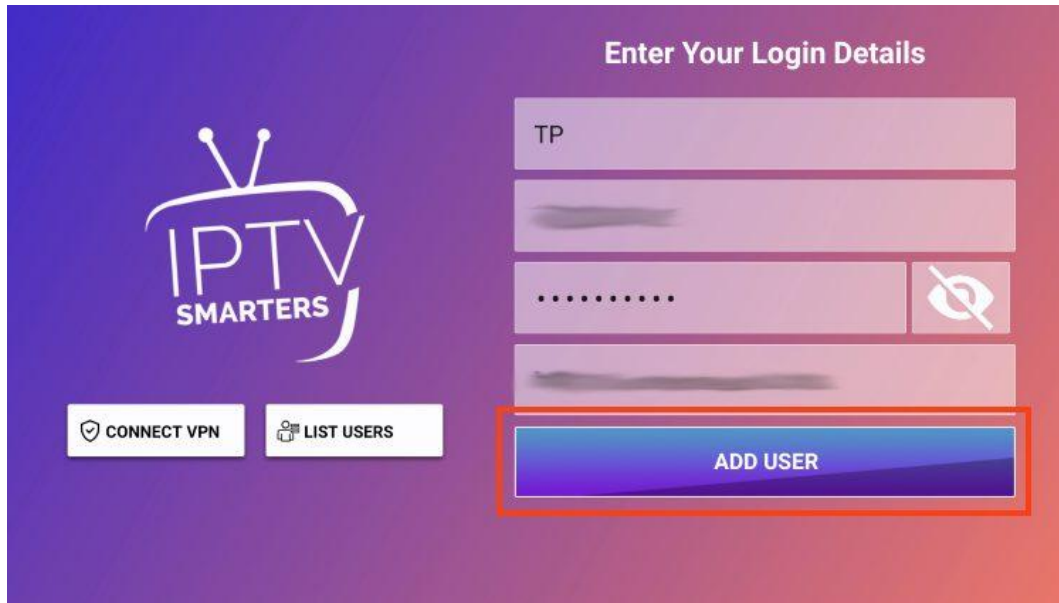

- **NOTE:** Scroll down through the announcement from Smarters Pro noting that they do not provide any playlists or content.

- Select Accept

- Choose Login with Xtream Codes API

- Enter Name of your choice. Example: (Stream4less)
- Enter User Name: Provided by Stream4less
- Enter Password: Provided by Stream4less
- Enter URL: Provided by Stream4less

- Wait for User added successfully message to appear
- You can now access your content for live streaming and more. Enjoy!
