

- This is a long term situation. Please start thinking in those terms.

The situation in which we find ourselves is a long time developing and will not be fixed in one or two elections. It will take all of us becoming involved at every level. From your municipal committees to Boards of Education to running for municipal, county and state offices. It will involve sacrifice as previous generations of Americans have sacrificed. You will however, be sacrificing for your children's liberty.

- Civic Technology – The Election Industry

A document has been posted to the CJCUC website. I will review briefly what is in it but I encourage you to educate yourselves and do your own research. It is an overview of the 'civic technology', 'election industry' that has now arisen due to a political agenda seeking to control our election process. The Zuckerberg funding played a large role in influencing our elections via large grants for COVID materials as well as new machines. Most counties in New Jersey are now purchasing Dominion machines regardless of whether WeThePeople have concerns about the technology on board these devices. There will be early voting and the machines will be in place for 10 days in various locations throughout the county. Mercer County staff said the machines used in early voting would not be used in regular election day voting due to the setup.

- Data Analysis

Jeff is presenting the findings of [Dr. Douglas Frank](#), from Ohio, who is a physicist/chemist by trade. He and other data experts throughout the country have identified patterns which are *indicators*, that an algorithm was in use by some entity during the election.

Three other data experts whose work you might have seen talked about in the media. Pattern recognition specialist Jovan Pulitzer from Texas, reported that he has obtained a commitment to fund his forensic audit of the 2020 election in Michigan. [Yesterday, he announced that he has been able to secure the verbal commitment from a private donor to fully fund my PKAD initial Forensic Audit of every ballot in Michigan voted in the 2020 General Election.](#)

Bobby Piton is a managing partner of an investment firm. From Illinois, he used Arizona's official government data to run his analysis. He asserts the "biggest fraud in the history of our constitutional republic is taking place right before our eyes." Piton presented his findings and said that he would never have certified Arizona's election results.

People throughout NJ analyzing the voter data from 11/3 as well as the content and data quality of the voter rolls. People with several decades of database and data management experience are looking at the entire election process here in New Jersey. Our goal is to meet with election officials in each county and review our findings which are many. And the same findings appear in each county in various amounts.

Remember, this is **NON-PARTISON**. Both parties have misbehaved in elections in New Jersey for generations. But now, it's time to stop the mismanagement and manipulation. Again, this is a long term effort and you as the voter must stay vigilant and engaged. At this time, I can describe some of the issues we have uncovered but more is in the offing and we are really just getting off the ground. Project management of this type with volunteers is difficult with people trying to live their lives and save their country at the same time.

Today, you can participate in the effort to get a 'forensic audit' to happen here in New Jersey by signing the affidavit at the Convention of States table. My understanding is that today is the last day for this particular effort.
