Intelligent Farming

# MPR Features

## Moisture Probe Telemetry

The FieldWise Moisture Probe Reader is capable of collecting and logging data from moisture probes. The data is read every 15 minutes from the attached probe.

## Why FieldWise?

Our priority is making equipment that is innovative, easy-to-use, affordable and built-to-last. We've collaborated with agronomists to provide the data you need in interactive, user-friendly charts. Your agronomist can maintain proper communication in regards to your crops health via text message and email. When paired with a pivot monitor, you get the best user experience money can buy.

Pivot and probe on same portal

Integrated solar panel

Can pair with weather sensors

Can pair with pivot monitor for irrigation management

Compatible with Aquacheck and Sentek probes

Readings taken every 15 minutes

Responsive and interactive graphs

Novice and Expert modes

Probe notices from agronomist
