

DoIT
Division of Information Technology
UNIVERSITY OF WISCONSIN-MADISON

IAM Site Reliability Engineer

The University of Wisconsin-Madison's Division of Information Technology (DoIT) is looking for a Site Reliability Engineer (SRE) to join our dynamic, growing team. DoIT supports teaching and learning at UW-Madison by providing innovative, user-centered, reliable technology solutions. The division is made up of more than 600 employees working together across multiple departments. A job with DoIT means great benefits, meaningful work and a supportive environment that prioritizes family and personal life/work balance. Also, this position does not have on-call time or generally require weekend or evening work.

Job Summary

This position is within the Identity and Access Management (IAM) Team which acquires, develops, and maintains identity and access systems, products, and tools for the entire University of Wisconsin (UW) System and, more specifically, UW-Madison. This includes designing, planning, developing, operating, and constantly improving our use and implementation of technology

Your Role

The work we do is varied and challenging, so you will need the tenacity to take on a variety of projects that benefit students, faculty, and staff at UW-Madison and beyond. As an SRE you will have the opportunity to implement and promote industry best-practices around continuous integration/delivery, deployment and orchestration, monitoring/alerting, and optimizing delivery of services across on-premises and cloud toolkits.

Who are we looking for?

Excellent candidates will have a drive to continually learn, enhance their technical skills, and work in a team environment within an exciting department that values problem-solving, communication, innovation, continuous improvement, and collaboration.

About The Job

[DevOps Engineer II \(IT106\)](#)

[DevOps Engineer III \(IT107\)](#)

Institutional Statement on Diversity

Diversity is a source of strength, creativity, and innovation for UW-Madison. We value the contributions of each person and respect the profound ways their identity, culture, background, experience, status, abilities, and opinion enrich the university community. We commit ourselves to the pursuit of excellence in teaching, research, outreach, and diversity as inextricably linked goals.

DoIT
Division of Information Technology
UNIVERSITY OF WISCONSIN-MADISON

The University of Wisconsin-Madison fulfills its public mission by creating a welcoming and inclusive community for people from every background - people who as students, faculty, and staff serve Wisconsin and the world.

For more information on diversity and inclusion on campus, please visit: [Diversity and Inclusion](#)

Bachelor's Degree Required

Qualifications

Required

- Professional experience with site reliability engineering, software engineering, or systems engineering
- Experience with version control systems (e.g., git)
- Knowledge of DevOps and other CI/CD tools and techniques
- Demonstrated desire to learn new things
- Excellent problem-solving skills
- Flexibility in development frameworks, languages, and other tools

Preferred Qualifications

- Experience developing automated deployment pipelines
- Experience with cloud hosting (e.g. AWS, Azure, etc.)
- Experience with Docker
- Knowledge of web authentication technologies
- Experience with SQL or managing objects in relational databases
- Excellent customer service skills and orientation.

COVID-19 Considerations

UW-Madison continues to follow necessary health and safety protocols to protect our campus from COVID-19. All employees remain subject to the COVID-19 Workplace Safety Policy: <https://policy.wisc.edu/library/UW-5086>. Please visit <https://covidresponse.wisc.edu> for the most up-to-date information.

Additional Information

Please note that successful applicants must be authorized to work in the United States without need of employer sponsorship, on or before the effective date of appointment.
