

Westmoreland Planning Board

On October 7th, 2021, pursuant to the September Planning Board's meeting, the following board members Lauren Bressett, Alison Fissette, Larry Siegal, Tim Thompson and Liana Capra, recorder, met with Todd Amato at the Cersosimo Excavating site on River Rd. The purpose for this visit was to check on progress and ensure conditions set for the excavation permit have been and are being met.

Members were shown areas that had been worked, tiered and reclaimed with sod. Other areas have been cleaned and a clear edging is in place. Berms are intact & grading is in good condition.

Lauren Bressett inquired as to a water line on the Wallace's abutting property and if it might be encroached upon. Todd Amato said no as that area contained too much clay and they were not planning to dig further into that hill.

Todd Amato did say that, depending upon demand for product, digging would be likely to be done within the next 5 to 10 years.

The visiting committee agreed that the excavation site has been well maintained and digging areas have been and are being kept in accordance with conditions laid out per permit requirements.
