RECYCLING

WHAT IS RECYCLING?

Recycling is a process by which waste products, such as glass, aluminum cans, paper and corrugated cardboard are collected separately and sold to help offset the cost of disposal of the solid waste.

Less Landfills means better water quality!

WHY RECYCLE?

Recycling reduces the amount of solid waste to be disposed. This translates into saved dollars. Every ton of solid waste recycled is one less ton that must be buried in a landfill or burned in a waste incinerator. We know that recycling can reduce the amount of trash we throw away by one-half. Recycling preserves precious land resources by decreasing the need for more and larger landfills.

HELP OUR ENVIRONMENT & REDUCE YOUR TAXES. RECYCLE!

WHAT TO RECYCLE

GROUP 1: NEWSPRINT/PAPER

Newspaper Egg Cartons Junk Mail Envelopes Magazines
Inserts Telephone Books Glossy Cardboard (cereal boxes, etc.)
Office & Scrap Paper (white or colored)

Please separate newspaper from slippery & other papers. We stack newsprint to get as much paper in the container as possible to save money and other papers mixed in with newsprint create landslides!

GROUP 2: CARDBOARD

Corrugated cardboard – broken down & flattened

GROUP 3: CO-MINGLE

- All plastic labeled with a recycle symbol
- Metal cans – please rinse clean & **crush**
- Glass: remove lids, rinse & clean. Labels can stay on.
- Milk jugs & detergent bottles must be **crushed**

No broken glass, light bulbs, window glass, mirrors, fish tanks, dishes, glass cookware, ceramics or other glass items.

REMINDER: Crushing plastic & cans saves hauling charges
