ALUMINUM

The Ultimate Recyclable

INFINITELY RECYCLABLE! Because it doesn't degrade in the recycling process, aluminum can be recycled forever!

USES 95% LESS ENERGY! Creating raw aluminum from recycled aluminum uses a fraction of the energy required to mine and process new aluminum (not to mention the environmental impacts!)

QUICK TURNAROUND! An aluminum can recycled today will be back on the shelf as a new can in 2 months!

JUST DON'T TOSS IT! The energy it takes to replace the aluminum cans trashed every year in the US is equivalent to **16 million barrels of oil** - that's enough to keep a million cars on the road for a year.

Recycle Me!
