

WRCNU FACILITY AT A GLANCE

A purpose-built Wildlife Hospital & Education Center designed for the full continuum of wildlife care, education, and conservation.

16,100 SQ. FT.

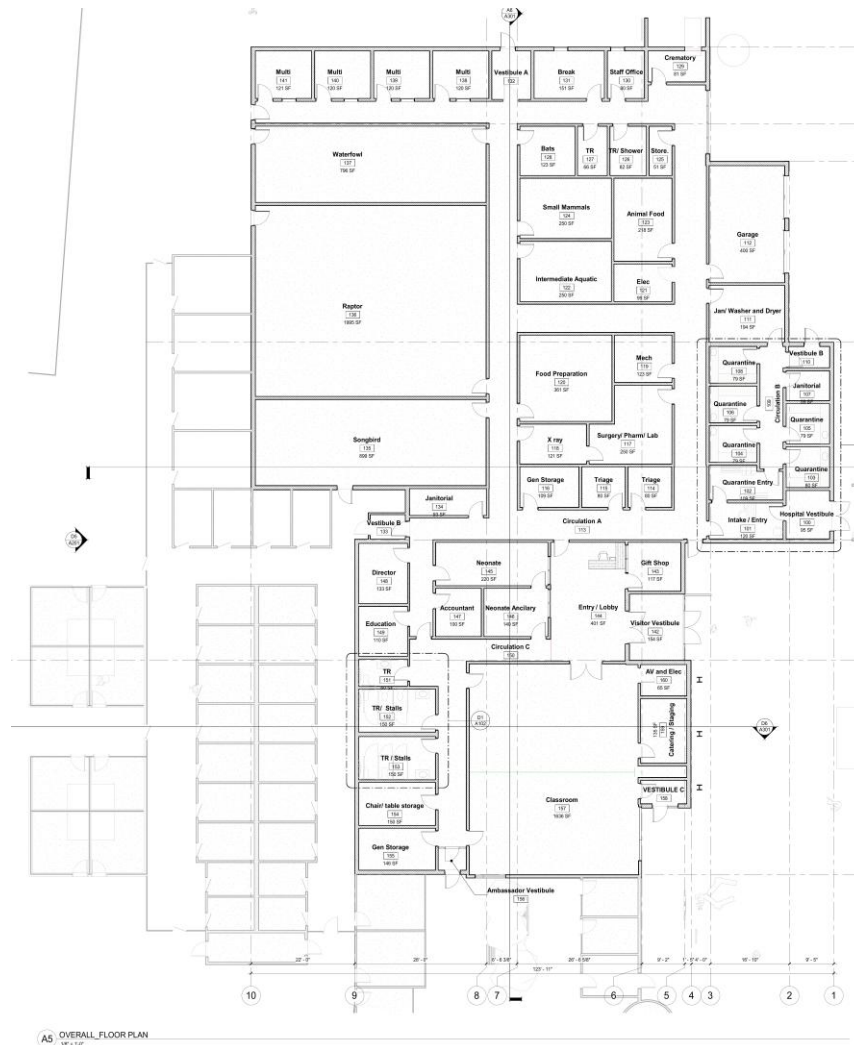

Building footprint

1,636 SQ. FT.

Dedicated classroom

SPECIALIZED CARE

From triage and surgery to species-specific care

WILDLIFE HOSPITAL

Two triage rooms

Surgery • Pharmacy • Lab •
X-ray • Quarantine

NEONATE CARE

Dedicated neonate room
with adjoining ancillary
support space

REHABILITATION & RELEASE

Purpose-built indoor care
connected to extensive
outdoor rehabilitation and
Ambassador habitats

SPECIALIZED WILDLIFE CARE

Dedicated raptor, songbird,
waterfowl, bat, small-
mammal, and intermediate-
aquatic spaces

EDUCATION & COMMUNITY

1,636 sq. ft. classroom •
Education room • Lobby
and visitor spaces

TRAINING & COLLABORATION

A facility designed to
support hands-on learning,
professional training, and
future collaborative
opportunities

From intake through rehabilitation, release, and public education, the facility brings the major functions of WRCNU together under one purpose-built roof.

Floor plan shown is based on the March 31, 2026 schematic design by PLACE Collaborative. Detailed architectural plans are available for review.
