1. Turn on and start the printer

To turn on the printer, press the blue 'power on' switch on the left side of the printer cabinet for approximately two seconds. Touch the green **Start Printing** button to print the current selected message.

2. Stop the printer

Touch the red **Stop Jet** button, and then use the **Power Off** button to turn off the printer when it is in the "Idle" state. For example, if you do not need the printer until the next day.

Use the yellow **Pause Printing** button to stop printing for a short time. Do not use the **Stop Jet** button to stop printing for a short time, because this button stops the jet.

3. Replace ink and solvent cartridges

Replace ink or solvent cartridges when the printer displays the "3.77 Ink Cartridge Empty" or "3.78 Solvent Cartridge Empty" Warning message.

Touch the **Need help?** button on the Warning message screen to display on-screen instructions about how to replace the ink and solvent cartridges.
