

ABOUT US

True Medical Advanced Care provides advanced wound healing solutions led by highly skilled Nurse Practitioners with extensive clinical backgrounds in wound care, trauma, and primary care. Through our mobile clinic model, we deliver high-level care directly to patients, removing the barriers of traditional office visits. Our mission is to make wound care more accessible, efficient, and forward-thinking. At True Medical Advanced Care, we lead with compassion, tailoring every treatment to the unique needs of our patients. Because of our mobile approach, providers bring expert wound care directly to the healing.

THE WOUND SPECIALISTS

Our team is led by Dr. Igor Mitreski, MD, a physician with more than 20 years of experience in surgery, primary care, preventive medicine, and advanced wound management.

Dr. Mitreski specializes in the evaluation and treatment of chronic and complex wounds, including diabetic ulcers and non-healing soft tissue injuries. His clinical services include comprehensive wound assessment, advanced dressing management, debridement procedures, negative pressure therapy, and graft-based healing solutions.

At True Medical Advanced Care, Dr. Mitreski provides physician-led clinical oversight for our mobile wound care program, delivering high-level care directly to patients in their homes or care facilities.

WHY CHOOSE US?

Integrity-Driven, Advanced Wound Care Specialists

The Science Behind Advanced Healing

- Our treatments are grounded in evidence-based wound care, incorporating therapies that support cell regeneration, reduce inflammation, and enhance tissue repair.
- Utilizing advanced healing technologies and clinician-guided protocols, we help accelerate wound closure while improving functional outcomes and quality of life.
- We focus on biological mechanisms that promote optimal healing—including fibroblast activation, improved microcirculation, and enhanced collagen deposition, resulting in safer more effective recovery.

BENEFITS OF OUR APPROACH

- Reduced Hospitalizations & Complications
- Faster, More Effective Healing
- Lower Recurrence Rates
- Improved Patient Mobility & Quality of Life
- Increased Care Efficiency for Home Health Agencies
- Lower Overall Treatment Costs

OUR SERVICES

At **True Medical AC** we provide integrity-driven clinician-led wound care wherever you need us. Our mobile clinic model delivers hospital-level treatment directly to the patient, ensuring safe, timely, and effective care without the barriers of traditional office visits. We offer comprehensive wound assessment, advanced debridement, mobile primary care support, chronic and non-healing wound management, post-operative wound care, infection-prevention strategies, and ongoing treatment planning. With expertise in high-acuity medicine and cutting-edge wound therapies, we bring reliable, compassionate, and results-focused care to your doorstep—promoting better outcomes and a higher quality of life for every patient we serve.

Advanced Wound Evaluation
Comprehensive on-site assessment of acute, chronic, and non-healing wounds with individualized care planning.

Debridement & Procedures
Sharp, enzymatic, and mechanical debridement performed by licensed specialists to promote optimal tissue healing.

Mobile Primary Care Support
Clinical oversight for high-complexity and homebound patients, including exams, medication management, and urgent needs.

Chronic Wound Management
Ongoing care for long-term wounds with infection-prevention strategies and evidence-based healing protocols.
