## Welcome Cattlemen,

Thank you for your consideration of our private treaty bulls! As we have built our herd over the last decade, we have selected genetic influence from some of the most prominent Red Angus breeders in the country, with the goal of producing moderate-framed, productive, fertile cattle with excellent feet and udders. This means culling hard every year and admitting that some cows look good on paper but just don't belong in a sustainable cowherd.

Severe drought persisted throughout 2023, and with it, a different set of obstacles. The drought brought short grass, scarce hay supplies and weeks of extreme heat stress. Calves came home from grass lighter than normal, and pregnancy rates throughout our area suffered. But, to borrow a quote from a neighbor, "Drought requires that you become great at what you do". So, we continued to cull hard and we are offering fewer bulls, simply to keep the quality where we want it. We feel confident that the struggles of 2023 have forced us to get better. Our cowherd is more consistent, more efficient, and we optimistically look ahead for the years to come.

We are excited to present our first sons of C-Bar Red Baron 207J (RAAA #4534321). We really like the mass, muscle and structure that 207J's offspring display. His dam, Leanna 8141F resides in our donor pen and we have also retained many Red Baron daughters as replacements. As much as we like the bulls, we like his daughters even more! Semen is available.

Bulls will have passed their Breeding Soundness Exam prior to possession. These bulls are easy to handle, have sound structure combined with EPD merit. We tissue sampled the bulls and are awaiting their accuracy-enhanced EPDs. These will be available upon request, or at the farm.

Enjoy the bulls,

Jeremy & Asia

## Terms

Bulls will have passed their breeding soundness exam prior to possession. Bulls will be guaranteed to be breeders in their first season, outside of any neglect or injury. We recommend you purchase insurance for your bull. Bulls are expected to be picked up no later than May 1, 2024 (unless other arrangements are made). Bulls are sold on a first come, first served basis.

Half-down of the purchase price will hold the bull until pick-up day. Volume discounts can be discussed.

Bulls are currently available for viewing. Contact Jeremy (402-860-4096) or Asia (402-366-7409) to coordinate a time.

## Raising the Bulls

The bulls are fed a developer diet post-weaning and we measure their gains. This year's bulls gained an average of 3.8#/day during the growing period. Once yearling weights are taken, we transition the bulls to a maintenance diet that is high in forage so they are prepared to go to work during their first breeding season. We don't strive to have our bulls gain too much too fast, as their foot structure and longevity are very important to us, but sometimes they gain better than we expect. We also pride ourselves in the disposition of our bulls. We handle them often and expose them to kids, dogs, and ATV's.

# Red Angus

## Haack Quarterback L02

Starting off our offering is Haack Quarterback L02. Quarterback genetics have been very popular for their production and consistency. This bull is age-advantaged, as his dam was in the fall herd of the C-Bar ranch when we purchased her. Safe for heifers.

## Haack Red Baron L12

This is the first of the Red Baron 207J sons in the offering. Red Baron produces wide topped, big hipped calves with tons of muscle, along with a balance EPD profile. L12's dam, 977G is outcross from Abigrace 636D and ICC Pay Raise who is heading towards our donor pen. Recommended for cows or larger framed heifers.

## Haack Red Baron L13

What a stud! This is another standout Red Baron 207J son since birth. Haack Red Baron L13 was a calf we just couldn't wait to watch develop. L13 is the balance of production, moderate frame and maternal merit that we strive for. L13 will produce steers that will perform well in the feed yard and daughters you'll want to keep as replacements. Safe for heifers.

## Haack Red Baron L15

L15 is another complete Red Baron son. His dam sports a 103 MPPA and is coming up on 7 years old. Smaller frame but with plenty of muscle, excellent structure and a great disposition, L15 is a complete bull that is hard to fault. Recommended for heifers.

## Haack Perseverance L17

Last spring we used some Perseverance semen on some of our older cows. The result was one soggy bull. Haack Perseverance L17 is deep sided and possesses extra frame. His dam is now 11 years old and she boasts a 107 MPPA. Recommended for cows.

Stony 8202F July 2023

Haack Red Baron L21 July 2023

## Haack Red Baron L21

L21 had been a standout all summer long and is Asia's favorite bull of 2024's offering. His dam, Stony 8202 has been one of our best producing cows and is working her way to our donor pen. Her daughter from 2022 is in the top of our replacement pen and in 2023 she gave a bull calf. Balanced EPDs, big topped, deep sided, and plenty of muscle throughout, L21 is a complete package. Safe for heifers.

## Haack Red Baron L24

Our Silver Bow daughters always get the job done. L24 has moderate frame, is wide topped and has plenty of rib. L24 also has an excellent EPD profile. If you are looking a bull that will produce thick, stout calves, take a look at L24. Recommended for cows.

## Haack Red Baron L34

L34 is the second black/red carrier of the Red Angus offering. His grand-dam is the famous C-Bar Abigrace Y11 and his grand-sire is EF Commando 1366 (pictured). L34 brings the same muscle and structure as the other Red Baron sons, with a little more performance and an outcross pedigree. Recommended for cows or larger framed heifers.

## Haack Perseverance L39

This Perseverance son is a thick-made bull. Recommended for use on cows. L39 is one of those soggy bulls whose frame carries a lot of mass. This gentle bull is sure to add pounds to calves as they wean from the cow and grow throughout the feed yard. Recommended for cows.

## Haack Red Baron L52

This bull was a product of our ET program, raised by one of our favorite commercial Red Angus cows. L52 is a long-bodied and soggy bull. His dam is Abigrace 831F, a mating of the C-Bar Stony A302 cow and Spur Franchise of Garton. This is another bull that should easily pass down the good feet and udders of his dam and grand-dam. \*Pending DNA verification. If DNA is not matched, this bull will sell as a commercial bull.
