High-yielding Dual-purpose Feed Hybrid Combined with Excellent Nutritional Value

- Strong agronomics allows for movement across many environments
- Very good performance across all soil types
- Semi-flex hybrid with sound agronomics allows for population flexibility

Agronomic Characteristics

Disease Tolerance

Gray Leaf Spot	3
Northern Corn Leaf Blight	3
Goss's Wilt	4
Bacterial Leaf Streak	3
Southern Corn Leaf Blight	-
Eyespot	-
Anthracnose Stalk Rot	3
Tar Spot	4
Fusarium Crown Rot	4
Common Rust	-
Southern Rust	-

Plant & Ear Characteristics

1-9 Scale: 1 = Best, Tallest or Highest; 9 = Worst, Shortest or Lowest; (-) = Not Available.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Performance evaluations are based on field observations and public information. Data from multiple locations and years should be consulted whenever possible. Individual results may vary depending on local growing, soil and weather conditions. IMPORTANT: ALWAYS READ AND FOLLOW SEED BAG/TAG DIRECTIONS.
