BUYER has 5 business days from purchase/delivery date to see your veterinarian to verify your purchase of a healthy, sound puppy. Please keep the receipt from the vet check in the puppy folder. If the puppy is not examined by a veterinarian of the buyer's choice within 5 business days of purchase, this contract is null and void. No other guarantee is given. Please note that simple worms, stress, separation from its mother or litter mates, loneliness, change in water/food or moving to a new home can cause the puppy to experience loose bowels or changes in its normal state of well-being and are excluded from our guarantee.

We do not guarantee against Parvo, Corona, Coccidiosis or Giardia after 72 hours of purchase. For the purposes of this agreement, once the puppy leaves the seller's premises, it is under the buyer's control and the seller is no longer responsible for any veterinary bills. If any treatment is rendered, it is at the expense of the buyer.

Emma Lou's Baby Bassets guarantees this puppy to be free of Genetic Defects that make the puppy not suitable for the purpose of a *family pet*--that reduces the quality of, or ends the life of the puppy--until it reaches one year of age. Buyer understands that the following slight genetic defects are not considered serious or life threatening and therefore are not covered: umbilical hernia, undescended testicle, underbite or overbite. Buyer understands that any and all guarantees expire one year from the date of birth and that if no problems are detected by that time, NO ACTION MAY BE TAKEN AGAINST THE SELLER.

Every puppy will be checked by our vet before they leave and come with a health report from the vet. Puppies also come with 30 days of free insurance that we provide at no additional cost to the buyers through Trupanion. If that insurance is not activated within 24 hours of receiving your puppy our health guarantee is voided. The seller cannot be held responsible for: size, weight, coat texture, coat length, positioning of ears, bite, color of coat and temperament.

If your puppy is very sick or has a congenital defect found by your vet, you will return him/her to the kennel (at buyers expense) with the registration papers and you must obtain a written statement from your vet, on office stationery and signed by him/her for our records, stating health risk and to include a description of the symptoms supporting his/her opinion to validate this guarantee. Any vet bills incurred to diagnose or repair a problem will be the responsibility of the buyer unless arrangements have been made or approved prior to treatment. Failure to do this will result in this contract being null & void. If you qualify for a replacement, you can choose a new puppy of equal value when one is available. You will be responsible for the shipping of a new puppy. We will not be held responsible for further costs.

Original puppy must be returned within 24 hours along with all the paperwork. (You agree to fill out all necessary forms to return ownership of the puppy to the breeder.)

This written agreement is a binding contract entered into the State of Oklahoma and is the entire agreement between the buyer and seller concerning the health conditions or loss of this puppy.

Emma Lou's Baby Bassets is to be notified if for any reason the puppy/dog is no longer wanted or can no longer be cared for. We will happily take our puppy/dog back at the purchaser's expense, without compensation to the purchaser and find a new home for the puppy/dog. We DO NOT want any of our puppies/dogs abandoned or placed in a shelter.

The buyer agrees to maintain the puppy's health condition, by maintaining all vaccinations or this contract is VOID! Puppy AKC Registration ID: _____

8. Showing Rights. Buyer may show the puppy/dog himself/herself, or may utilize the services of a professional handler. Buyer shall be responsible for all expenses related to showing the puppy/dog.

9. Ongoing Communications. Both parties agree to promptly notify the other of any change of email or phone number. For the avoidance of doubt, if Breeder takes possession of the puppy/dog in accordance with this section, Buyer shall not be entitled to any refunds of any payments made to Breeder.

11. [Agreement to Mediate. If a dispute arises out of or relates to this Agreement, or the alleged breach thereof, and if the dispute is not settled through negotiation, the parties agree first to try in good faith to settle the dispute by mediation before resorting to arbitration, litigation, or some other dispute resolution procedure. The process shall be confidential based on terms acceptable to the mediator and/or mediation service provider.]

12. Governing Law. This Agreement, and all matters arising out of or relating to this Agreement, shall be governed by and construed in accordance with the laws of the State of Oklahoma, without regard to the conflicts of laws provisions thereof.

13. This Agreement constitutes the entire agreement between the parties regarding the subject matter herein and supersedes all prior or contemporaneous agreements, negotiations, discussions and understandings, written or oral, between the parties with respect to such subject matter. Neither party may assign, transfer, or subcontract any obligations (or rights) under this Agreement without the prior written consent of the other party. 15. New owners must provide documentation of vet visits to breeder once the owner takes the dog from the breeder.

Growth Plate, Orthopedic, and Developmental

Purchaser acknowledges that puppies are living animals whose growth and development are influenced by genetics, nutrition, environment, activity level, injury, accidents, and other factors beyond the Breeder's control. The Breeder cannot guarantee the future development, structure, growth rate, conformation, or orthopedic health of any puppy.

Purchaser understands that growth plate injuries may result from trauma, repetitive impact, excessive exercise, jumping from furniture, stairs, vehicles, decks, or other elevated surfaces, accidental injury, nutritional factors, environmental conditions, or causes that cannot be definitively determined. Because the exact cause of many developmental orthopedic conditions cannot be established with certainty, the Breeder shall not be held liable for orthopedic or growth-related abnormalities diagnosed after the puppy leaves the Breeder's care.

The Breeder strongly recommends limiting repetitive impact activities, excessive exercise, and jumping from elevated surfaces during the puppy's growth period, as such activities may contribute to orthopedic injuries and developmental abnormalities.

IN WITNESS WHEREOF, Breeder and Buyer have executed this Agreement effective as of the Effective Date.

Spring Safety Tips for Dogs

Simple safety tips for a worry-free spring with your pet.

Check the weather

Just because winter is over does not mean that cold days are over. Both rain and mud can cause damage to your pal's paws, so consider investing in a good set of dog booties or using petroleum jelly as a protective balm. Always check the weather before heading out with your pet and properly prepare.

The grass isn't always greener

Dogs love to play on grassy lawns, but keep a close eye on their activity and their surroundings. Grass awns (foxtails) can be easily inhaled, swallowed, or stuck under your pet's skin. If not removed quickly, they can lead to infections and other serious health problems. You'll also want to keep pets off of freshly fertilized lawns, which can be toxic.

Play safe with all plants

It's not just grass that you should practice caution around this spring. Popular garden plants like azaleas, chrysanthemums, daffodils, and lily of the valley can cause moderate to severe toxic reactions in dogs. Always research plants before adding them to your yard, and don't leave pets unattended outdoors.

Keep dogs off freshly-fertilized lawns for at least 72 hours after application.

Over 60% of foxtails are embedded in the ear, nose, or paw.

An air purifier may help with seasonal allergies and the effects of cleaning product fumes on pets.

Spring allergies affect pets too

Just like humans, dogs can experience seasonal allergies to pollen, dust mites, mold, and other environmental allergens. Make an appointment with your veterinarian if you notice signs like excessive scratching or licking, red/irritated skin, or watery, red eyes.

Time for flea & tick control

Dogs are at risk of fleas and ticks both indoors and out, as these tiny insects can make their way inside and onto your pet's fur via open doors and windows, shoes, and human clothing. Because they can carry a variety of illnesses (including invasive parasites), practicing monthly flea and tick control is crucial to your dog's well-being. Talk with your veterinarian about what options may be best for your pet.

Keep spring cleaning pet-friendly

Maintaining a clean household is important for the health of pets and humans alike, but be careful with the products you're using. Many soaps, bleaches, polishes, and other cleaning products can cause skin irritations in animals or be toxic if swallowed. Consult with your veterinarian about what may be safest, and keep pets out of the room while you're cleaning.

Secure windows mean secure pets

The increasingly warm, nice weather makes it tempting to open the windows. Before you do so, check window screens to ensure they are secure. Dogs may be drawn to the interesting smells coming through windows, and the last thing you want is your furry friend sneaking through or falling out.

Practice good leash training habits

With the weather getting nicer, it's the perfect time to get out and bond with your dog on regular walks! Use positive reinforcement to instill your pup with good leash etiquette — their ability to stay calm and obedient when out and about will help keep them out of harm's way.

An estimated 10-20% of dogs experience springtime seasonal allergies.

Brushing your dog regularly will help keep their coat neat and healthy during spring shedding.

Avoid bone meal fertilizers, as these can be toxic to dogs.
