

SPORT PERFORMANCE PACKAGE

COMPLETE REVIEW OF YOUR EQUINE ATHLETE

\$1100.00

Full lameness exam including movement, flexions, hands on palpation of all the important structures, hoof exam including farrier consult and foot xrays.

Upper airway endoscopy to look at the airways- one of the most under appreciated aspects of performance. This exam looks at the pharynx, larynx, arytenoids (flappers), trachea and all associated upper airway structures / functions.

Gastroscopy to look for any signs of gastric ulcers or esophageal ulcers. Gastric ulcers are a significant performance limiting condition of our equine athletes and something we can treat very effectively.

1. Includes initial gastroscopy and 2nd gastroscopy in 30 days.
