

ELDER'S EQUINE IS A PROUD SUPPLIER

MB MAD BARN™ MSM JOINT SUPPORT

Mad Barn's bulk MSM powder is recommended to support healthy joints, tendons, and ligaments in your horse. It is commonly used to improve comfort and mobility in aging horses as well as performance horses.

MSM (Methylsulfonylmethane) is a natural compound that contains sulfur in a highly bioavailable form. Sulfur is an important component of glucosamine and collagen, helping to maintain healthy connective tissue and cartilage in your horse.

Research also shows that MSM has antioxidant properties and can improve recovery from heavy work. In one study of performance horses, it was shown to reduce biomarkers of oxidative stress following intense exercise.

Your horse's diet may naturally provide small amounts of MSM because this compound is found in fresh forage and grains. However, the amounts that are naturally present in feed are generally too low to provide any benefits, making supplementation necessary.

- Supports joints & connective tissue
- Improves post - exercise care
- Helps maintain comfort in senior horses
- Acts as a natural antioxidant

DIRECTIONS FOR USE

Consult with a nutritionist or veterinarian prior to use.
Top dress once daily on feed or ration.

BODY WEIGHT	SCOOPS	DOSE
<440LBS	3/4 SCOOP	5G
440LBS - 1100LBS	1 1/2 SCOOPS	10G
>1100LBS	3 SCOOPS	20G

1 scoop = 9cc = 7 grams

FEEDING DIRECTIONS

INGREDIENT

Methyl Sulfonyl Methane

SERVING SIZE

10-20 grams per day

Recommended Use: Supports joint health, connective tissue and post-exercise care.
