AWARD POINTS USING 'MNSCHA POINTS TABLE'

This setting will award points to each rider on the top teams in the final class standings, based on the total number of teams in the class. One point and one winning place will be added for every 5 (or part of 5) teams in the class, as shown in the table below.

Number of Teams	1st	2nd	3rd	4th	5th	6th	7th	8th	9th	10th
2-5	1									
6-10	2	1								
11-15	3	2	1							
16-20	4	3	2	1						
21-25	5	4	3	2	1					
26-30	6	5	4	3	2	1				
31-35	7	6	5	4	3	2	1			
36-40	8	7	6	5	4	3	2	1		
41-45	9	8	7	6	5	4	3	2	1	
46-50	10	9	8	7	6	5	4	3	2	1
And so on										

Example:

If there are 112 teams in the class, you divide by 5 to find the number of points and places to be awarded. In this case, 112 divided by 5 equals 22.4, which gets rounded up, so 23 points will be awarded to each rider on the 1st place team, 22 points will be awarded to each rider on the 2nd place team, and so on up until the 23rd place team.
