

Our Fiber & Ethernet Networks

available for multi-tenant locations

WAVELENGTH™

Wi-fi at the speed of light

Our Wavelength networks are built with fiber-optics to deliver the fastest, most reliable Internet access around.

Standard Speeds

25Mbps / 10Mbps

Premium Speeds

250-1000Mbps / 50-250Mbps
(varies by location)

Available In Zip Codes

21201, 21202, 21210,
21211, 21218,
and 32550

Equipment Cost

\$200 or \$20/month for 12 months
(add \$80 per pod for Premium Plus)

Port1000

A 1000Mbps residential network. Damn, that's fast.

Our Port1000 networks are built with the same proven Ethernet technology that powers most business networks.

Standard Speeds

25Mbps / 10Mbps

Premium Speeds

250-500Mbps / 50-100Mbps
(varies by location)

Available In Zip Codes

21201, 21202, 21209, 21210,
21211, 21218, 21224, 32541
and 32550

Equipment Cost

\$100 or \$10/month for 12 months
(add \$80 per pod for Premium Plus)

Frequently Asked Questions

Can I use my own router? Most Ethernet routers work with Port1000, but Wavelength requires an Optical Network Terminal like the Calix GigaCenter 844G. DSL and cable modems won't work on either of our networks.

How reliable are your networks? We engineer all of our networks for at least 99.99% availability (no more than 52 minutes per year of downtime). Factoring in power outages, severe storms, and equipment failure, our average customer is online 99.8% of the time (364.2 days per year).

Will I be under contract? All of our residential services are month-to-month, with a 100% Satisfaction Guarantee. We want you to love your connection.

A Better Alternative to Cable or DSL

\$ Lifetime Price Guarantee

Our competitors offer low prices — for the first year. Then your bill doubles when you're moved to standard pricing. We guarantee that what you pay for your plan will never increase, and our No Fee Guarantee means you'll never be surprised by a hidden extra.

📶 Your Own Equipment

Our competitors charge endless monthly equipment rental fees. We offer Bring Your Own Device (BYOD) pricing, so you can buy your equipment from us or a third party and never pay a rental fee. With Port Networks, you have control over your monthly bill.

🔒 Truly Private Wi-Fi

Did you know Comcast uses its customer's modems as hotspots, re-selling their connection to strangers (and pocketing the extra cash)? We would never two-time you like that. We let you decide who's allowed to use your Internet connection.

📅 Quick, Safe Installation

No one wants to wait for Internet access, so we try to connect all new customers within two business days. And during this time of pandemic, all of our techs are equipped with personal protective gear to ensure your safety (and theirs).

STANDARD	PREMIUM	PREMIUM PLUS

Do You Need Better Wi-Fi?

Wi-Fi used to be a fun extra from your ISP. Now your laptops, tablets, phones, TVs, doorbell, thermostat, and cameras all need a strong signal throughout your home. Our **Better Wi-Fi** service uses Plume Superpod meshed access points and powerful software to deliver better reception, better protection against hackers, and better control over the Wi-Fi in your home.
