

WILROSE ENVIRONMENTAL LTD ENVIRONMENTAL POLICY STATEMENT

The Environmental Policy of WILROSE ENVIRONMENTAL LTD ensures that as far as is reasonably practicable, its operations will be carried out with a commitment to protect and enhance the environment whilst fulfilling our compliance obligations.

The scope of the Environmental management system (EMS) provides a framework for setting environmental objectives and targets, that are in relation to the products, services, activities, impacts and aspects of our business.

Wilrose Environmental Ltd is committed to leading the industry in minimising the impact of its activities on the environment. The company acknowledges its responsibilities to offer services that divert waste from landfill and embraces all new technology available in the market.

Our stated aims are to:

Wilrose is committed to helping our customers focus on the reduction of their carbon footprint and increase their recycling rates.

Wilrose Environmental Ltd will proactively review and implement targets quarterly to ensure that we maximise the use of all methods of recycling to ensure that we do our part to minimise the use of non-renewable raw materials.

Wilrose Environmental Ltd make the following commitment:

- Promote the waste hierarchy.
- Minimise waste by evaluating our own operation to ensure they are as efficient as possible.
- Ensure that all of our operations reflect a commitment to meet and exceed all current legislation and our internal and external compliance will be regularly monitored.
- Actively promote recycling, pre-treatment, and diversion of waste from landfill.
- Proactively investigate all new technologies within the waste industry and be quick to adapt to the changing market and legislation.
- Promote and encourage environmental awareness in customer sites and our own operations.
- Maintain our vehicles to ensure they are fully legally compliant with all environmental requirements at all times.
- Review and update our fleet to ensure we use modern vehicles with low emissions and efficient fuel usage.

- Review our route scheduling regularly to ensure the most efficient use of our vehicle driving hours.
- Ensure environmental considerations are regularly reviewed and improved in formal discussions.

We aim to continuously improve our environmental performance, particularly with regard to waste disposal routes, fuel consumption, vehicle maintenance, recycling and re-use of office waste etc.

Consider the context of our organisation and look to reduce the volume of raw material and energy consumption used in the creation of our service or product.

Manage waste generated from business operations according to the principles of reduction, sustainable procurement and re-use or recycling.

Comply as a minimum with all relevant environmental legislation as well as other environmental requirements, including ISO 14001:2015.

This Environmental Policy Statement will be regularly reviewed and updated as necessary, be communicated to all relevant employees, and be made available to interested parties.

The management team endorse these policy statements and are fully committed to their implementation.
