Dear Friends:

It just keeps getting better and better here at ThinHaus. Our customers are constantly helping us design more interesting and more complete models that offer more options for tiny living. Interestingly, our Original ThinHaus still reigns supreme with all the features anyone could want at a size and price point that seems just about perfect for most everyone.

So, what's new in Catalog #3? Well, we'll added a zillion more pics of our famous Shou Sugi Ban & Poplar interiors. You can now see what the "B" model looks like (spoiler alert: It's the mirror image of the classic "A" model). The "T1885- Traveler" is introduced for those folks looking for a more mobile tiny home experience and there are even more blog entries to read yourself asleep on the upcoming long winter nights.

There are two major areas of concern about tiny living that we hear everyday ... tiny home placement and finance. ThinHaus is very pleased to report that these concerns are really problems of the past. Check out our pages that go into these things in more detail. You will find that anyone with a descent credit rating can now buy a ThinHaus using mostly or completely bank money ... and it's not all that hard to do!

Locating a THoW (Tiny House on Wheels for those new to the class) is also easier to do. The traditional placement on private land has become practically commonplace and news articles about it are all but gone. Tiny House Villages are springing up all over the country and with the new economic picture developing, this looks to be even more of a thing in the months and years to come.

How nice is it that you can downsize your house without downsizing your life? Living in a ThinHaus is just like living in a great house that costs less ... because it is. It's just that simple.

Without further adieu, we invite you to enjoy our Fall 2020 ThinHaus Catalog #3. As always, delivery from stock in the US is included with every complete model and custom changes are all part of the plan. Let us know what you want and we'll do all that we can to make it so.

Sincerely,

ThinHaus

Jay Leopold
