How to Improve and Double Your Performance

Learn how to dramatically increase your productivity and income by promoting yourself, your products, and your services through various tools and systems that can measure the results.

A Special Message ...

It is often said, “*there are no guarantees in life, even though you have great ideas and with due diligences execute it, you may still end up flat on your face - broke...*”

This might be true in some cases. However, going through hundreds of books, master mind groups, success stories of ‘rags to riches’ people and from personal experience for the last 15 years, has made me convinced that **the best insurance policy from failure** is to **have a proven system and a team to help you follow it diligently** – *this is the core of this workshop.*

And if you have any doubt, just call us or drop a mail. We will provide you with all the information

There are 4 parts to this intensive 3 Days Workshop:

1. Feel the Impact of all the Limitations & Barriers: Decode Failures and Unlock Your ‘Genie’

You will discover how you have had all that you wanted right in front of you – the chain was your own creation. You will see for yourself why all your hard work did not pay you the return you so rightly deserved because of “**The 3 Stumbling Blocks**” you had **unknowingly** planted before your vision.

2. Break free from the Clutches:

Distinguish the difference between Suffering cost of Failure and Suffering cost of Success...Pay the Price of SUCCESS or Suffer the Consequence of Failure...said in another way when you chose, not to continue paying the Price of Success, you chose to Suffer, the Consequence of Failure. This will be the most ‘eye-opening’ part of the Workshop

3. Start Your Journey: Slicing through smoothly...

Just imagine you are using a knife that hasn’t been sharpened for a long time. “How stupid is that?” You would say. But then that’s exactly how most people do with their business and work. And you will see for yourself where things had gone wrong even though you had been doing the right things. The “**12 Sure Success Steps**” will make you so sharp, people around you will eagerly want to pay you to know the secret.

4. Participate in “The Mission 101 Days Hustle” – Get the Edge...

Achieve Your Goals with laser sharp tools and systems: working within a structure and a team of dedicated like minded people, who will hold each other to account and also be of support as spring board to launch into un-chartered, unknown terrains. You will not be alone in your journey to achieve the most ambitious and audacious GOAL/s of your life.

We promise, you will experience a life you have never lived before in those 101 days

Trust or Doubt: one of which will be the deciding factors for your decision...

You might be thinking:

1. Who are you?
2. Why should I sign up for this workshop?
3. How can I trust you?
4. What makes you so sure of the success of what you are saying?
5. How can you be so bold in declaring such outrageous results?
6. I have a different kind of business/ profession

And many more... and all these can be summed up in one word – DOUBT (absence of Trust). And it's very normal and natural for us human beings.

However, even if I convince you with all the credentials and testimonials you will still have doubts and I do not intend to remove that. The only solution I can provide is if you have identified with anything above and want them for yourself then trust your gut and sign up. And as I have said earlier, if you still have doubts, call me and ask me as many questions you would want answered.

What led to the launching of this workshop?

Over the last 15+ years while coaching individuals and training in the corporate and colleges I realized there is a great need for workshops that can help people to take on more responsibilities and bigger challenges and dream big. This is the first Open House Workshop that has been launched to cater to this need and I am sure this will be a great event in the lives of those who participate in it.

I have laid down everything in simple language step by step without using jargons - making it easy for any common man to understand and implement all the learning to get the results they want.
