

WHAT CAN YOU EXPECT WHEN WORKING WITH ROUTE 66 SOLAR?

SALE

Congratulations, we have now entered into an official agreement to move forward with your upcoming solar project! Any sort of financing will be finalized during this step.

1

SITE SURVEY

We inspect your property in person and investigate the ideal solar panel placement. Trees and other property improvements needed prior to the installation are evaluated.

2

ENGINEERING

Our team of engineers build a custom system tailored to your property. The tilt of your roof, the azimuth of the panels, and any nearby shading are all important factors.

3

PLAN SET REVIEW

Our dedicated team creates a professional set of drawings and information needed for our proposed project and permit process that will follow this step.

4

PERMITTING

As a locally owned company, we are familiar with differing municipal codes across Illinois. Permits must be approved before a project can move forward.

5

PRE-INSTALLATION

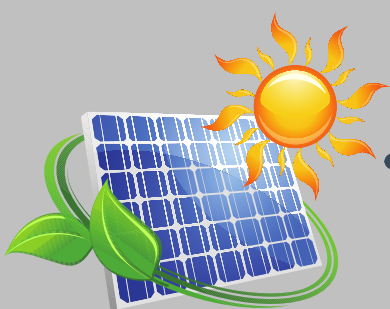

Materials for your project (solar panels, inverters, racking, and electrical components) are finalized. Our distribution partners source the materials and setup delivery to your home prior to the installation start date.

6

INSTALLATION

Our local team of installers work to complete the project. Everything from the roof mounts, rails, panels, wiring and inverter connections are completed during this process.

7

INSPECTION

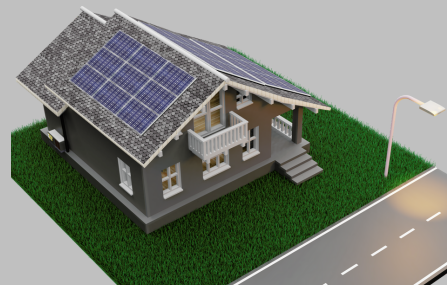

Local inspections required will be completed first. Next, a utility inspection will be scheduled. Both are dependent on your availability, access to your property and adequate sunshine is needed to conduct a successful test.

8

SYSTEM OPERATIONAL

Our solar installation project is complete! You can officially start harnessing the power of the sun on your property through our newly installed system.

9

APPLICATION

SUCCESS

SREC APPLICATION

We will manage all of the paperwork of the solar energy renewable credit application. SREC allows you earn money for any electricity your solar system generates!

10

MONITORING

We offer 24/7 online monitoring of your system. Find peace of mind that Route 66 Solar is here should any issues arise during any of the 25 year product warranties.

11

FEDERAL TAX CREDIT

Don't forget to take advantage of your 30% solar federal tax credit* when you file your taxes for the year your system installation was completed. *Qualifications must be met
