

AAMD
DENTAL

case study

Solar for Medical Facilities

25 year savings estimated at \$164,149

AAMD is a dental office located in Champaign, Illinois. As a business owner there are many operating expenses, but one monthly expense you can control is your electric cost. This dental practice was ready to lower their out of pocket monthly expenses on utility costs by adding solar to their building. Route 66 Solar was able to not only allow this client to take advantage of incentives while making use of an accelerated depreciation strategy that covered 19% of the overall system cost. Solar is a great long-term investment for any business looking to cut monthly operating expenses. Current incentives make it more affordable than ever for a business to go green and save green.

Project Summary

Annual Energy Usage 24,341 kWh
Estimated Energy Production 17,594 kWh
