# » Chat AI

Turn shoppers into buyers with the auto industry's most advanced generative AI chat solution

Powered by state-of-the-art generative conversational AI technology and automotive-specific large language models, Chat AI is designed to turn vehicle shoppers into buyers. Chat AI's personalized, VIN-specific conversations and interactive content pre-qualify more customers without human intervention, lowering abandon rates and reducing the need to rescue chats. That means more appointments and more productive personnel. This is what next-generation chat looks like.

Deliver superior customer experiences — and better business results

- » Purpose-built to drive dealer and OEM business outcomes
- » Humanlike conversations powered by automotive-specific large language models
- » Automotive optimization and control layers mitigate jailbreaks and hallucinations

Greater operational efficiency with less human intervention

- » Delivers immediate responses and humanlike, highly engaging conversations
- » Answers complex inventory, financing, trade-in, and service inquiries
- » Schedules appointments right within the chat—and directly to your CRM
- » Full set of customization options to support dealership business practices and OEM brand standards
