**Sirab Technologies Transportation Pvt Ltd,
Chennai, India.**

Dear Mr. Raghavendra Mysore,

**Subject: Letter of Intent to deliberate on Automated Vehicle based People Mover Systems
at IGI Airport, Delhi.**

This letter serves as Letter of Intent to deliberate on Automated People Mover Systems based on Sirab Technologies' automated road vehicle lane keeping and platooning.

Delhi International Airport Limited (DIAL) is realizing increasing demand of passenger, cargo movement and activities at IGI Airport and necessitates need for an Automated People Mover (APM) system. DIAL has proposed an Automated People Mover (APM) between Terminal 1, T2, T3, and Cargo Terminal and Aerocity Station. The Master Plan 2016 has similarly made provisions for an Automated People Mover system.

Sirab Technologies has presented an interesting Automated People Mover System based on Automated Vehicles to bring connectivity between terminals and transportation hubs. Further to request for a techno-commercial proposal on a Build Operate Transfer (BOT) model, and submission of proposal by Sirab Technologies, DIAL intends to further evaluate on feasibility of automated vehicle based APM system proposed by Sirab Technologies.

DIAL is evaluating various alternatives to connect the terminal precincts including other APM solutions, PRT, LRT, cable-based options and BRTS. In this regard, DIAL may have collaborations/ contractual arrangements with other service providers for implementation of the same.

The proposal submitted by Sirab Technologies shall not be binding to DIAL, and DIAL may select an alternative technology. All costs and expenses incurred in carrying out the Study shall be borne by Sirab Technologies.

Sincerely,

For Delhi International Airport Limited

K Narayana Rao

Dy Managing Director (GMR GROUP)
