Chair, Centre of Business Innovation & Digitisation
Asia Pacific University of Technology & Innovation

FUTURELAB'S *SMART MATCHING* ALGORITHM REVIEW AND DEVELOPMENT PROJECT

FutureLab is a Malaysian start-up engaged in the provision of a social learning community platform that connects "mentees" with the right "mentors". As part of our enhancement pathway, we are exploring new ways to enhance the Smart Matching component inherent within our search engine.

We would like to invite Asia Pacific University's Centre of Business Innovation & Digitisation (CBID) to spearhead a project to review and improve the Smart Matching algorithm, in collaboration with Ms. Vijaya Shree Raja Sekaran (TP053740), the research associate of CBID.

Kindly send us a reply confirmation for our next course of action. We will require the signing of a Non-Disclosure Agreement (data privacy related). You will also need to provide us with project scope and plan, detailing the data required for the project purpose.

Kindly contact us for further inquiry, if any.

Thank you.

Yours sincerely,

Brian Tan Boon Yong
CEO & Co-founder
