Subject: Request to Catalog Decodable Readers for Dyslexic Students and Emerging Readers

Dear [Library's Name],

I am writing to express my enthusiasm and support for the valuable role libraries play in fostering a love for reading and learning within our community. As well, to support dyslexia awareness in British Columbia; I would like to request that [Library's Name] consider adding a collection of decodable readers to its shelves. These resources hold immense benefits not only for dyslexic students but also for all children who are in the process of learning to read.

Decodable readers are carefully crafted to align with phonics principles, helping young readers build foundational skills in a systematic and accessible manner. These readers can be an invaluable addition to [Library's Name], and here's why:

1. **Support for Dyslexic Students:** Decodable readers are designed with specific attention to phonetic patterns and consistent sound-symbol relationships. This makes them exceptionally useful for dyslexic students, as the predictability of sounds can reduce reading challenges and build confidence.
2. **Structured Learning:** Decodable readers provide a structured progression of difficulty, allowing emerging readers to gradually build their skills. This methodical approach supports the development of strong reading foundations.
3. **Inclusivity:** Stocking decodable readers aligns with [Library's Name]'s commitment to providing resources that cater to diverse learning needs. These readers can empower children with varying reading abilities to engage with literature at their own pace.
4. **Early Literacy Support:** Decodable readers are ideal for children who are at the early stages of their reading journey. By offering them, [Library's Name] can play a crucial role in nurturing literacy skills from the very beginning.
5. **Parental Engagement:** Parents often seek resources that align with their child's learning needs. Providing decodable readers can encourage parental involvement in their child's reading development.

6. Educational Partnerships: Collaborating with local schools and literacy programs, [Library's Name] can promote the use of decodable readers as supplementary resources for classroom learning.
7. Positive Reading Experiences: By introducing young readers to books that match their skill level, [Library's Name] can help them experience the joy of reading without the frustration of encountering overly challenging texts.

I kindly request that [Library's Name] consider allocating space for decodable readers in its collection. These books can contribute to a more inclusive and supportive reading environment that benefits dyslexic students, emerging readers, and families within our community.

Thank you for taking the time to consider this request. I would be more than happy to provide additional information to make this initiative a reality.

Sincerely,

[Your Name]
