

Organic Lawn Care Program

Eight lawn care applications will be applied during the growing season featuring Holganix, the “Easy to Green” solution as the primary nutrient source. Our organic program will provide ALL the necessary products throughout the year to achieve exceptional results.

March, April, May:

- Fertilization formulated for early green up coming out of winter
- Balanced feeding for long term nutrient up take
- Pre-emergent Crabgrass and grassy weed control
- Selective post emergent broadleaf weed control
- Soil test

June, July, August:

- Balanced slow release fertilizer formulated for hot/dry conditions
- Disease control where needed
- Selective broadleaf weed control
- Grub control and other insecticide applications where needed
- pH modification (lime)

September, October, November;

- Balanced fertilization for cooler fall months
- Selective post emergent broadleaf weed control
- pH modification (lime)

Included in our organic lawn care program are no charge service calls, annual soil test, and the results will be provided upon completion. This is an ALL INCLUSIVE program, free of any additional fees regarding the above services.

*Deluxe Aeration package – Our core aerating machine will removes cores of soil up to 3” deep and approximately 8 per square foot. This kind of penetration and coverage will provide for excellent seed germination where the cores have been removed. Also, included in this service is a super heavy over seeding of the lawn with up to 8 lbs. per 1000 square feet of our quality turf grass seed. Our seed blend consists of a blend of improved turf type tall fescues, each with its own unique characteristics and seed starter fertilizers for quick germination and maintenance levels of lime to help balance the pH. The Deluxe Aeration package is an integral part of maintaining and improving your turf area.

*Leaf/Compro Mix – Organic certified & sifted soil with the proper pH and nutrients necessary for new seedlings.

*Soil Testing – Soil testing is crucial to helping us understand the needs of your lawn and landscape. Upon request, included in our Organic Program, a soil analysis will be taken at the initial service. Soil corrections will only be applied at the proper time of the year. Soil correction is included in our Organic Program.

*Soil Correction –

- Lime – calcite/dolomite – helps to raise and maintain a balanced pH level
- Phosphate – stimulates root growth and seeding development
- Potash – improves drought tolerance and strengthens stem and leaf tissue
- Iron – provides quick green up and helps protect against disease and fungus problems

*Tick/Mosquito Control – Natural Cedar Oil Base is all natural and safe to rid your property of these pests. Also controls populations of mosquitoes, gnats, fleas and spiders. Will not harm beneficial insects such as bees, butterflies or earthworms.

*These are optional services not included with the organic lawn care program.
