Lighting Techniques

FROM SIMPLE TO DRAMATIC, HERE ARE SOME WAYS TO LIGHT UP YOUR LANDSCAPE DESIGNS.

Uplighting – Illuminate trees, plants, water features or distinctive architectural elements

Downlighting – Create circle of light on the ground to guide the eye along a path

Moonlighting – Place soft lights in trees to mimic moonlight and add security without the glare of flood

Mirror lighting – Light background areas around a pond or pool to produce reflections

Grazing – Accentuate the textured surface of a wall by placing an uplight against its base

Silhouetting – Place lights between a wall and plantings to silhouette trees and shrubs

Shadowing – Cast shadows on a façade by putting lights in front of landscape elements and pointing them toward the home or building

Low Voltage & LED Lighting – Environmental
