

# THE GOLDEN LAND

THE GOLDEN LAND is a memoir of my father's life, taken from the stories he told his grandchildren.

With the help of my son-in-law writer, what started as a simple task became a years-long research project and writing effort that resulted in this story of our family's journey to America.

As a whole, these stories are America – the story of all the immigrants coming here from all the other countries of the world, looking for the freedom to live their own way and make something of themselves.

This book could be the story of your family.
