

# DRILLING DYNAMICS

## GEOTECHNICAL & ENVIRONMENTAL DRILLING SERVICES

### CAPABILITY STATEMENT

Drilling Dynamics are a Tasmanian drilling contractor specialising in geotechnical and environmental drilling services for the engineering, civil construction, and mining industries.

Founded in 2024, we offer a fresh approach for clients seeking a drilling contractor that prioritises quality, safety, and client satisfaction at every stage of the process.

Our operations are underpinned by accountability, reliability, and robust safety systems. With strong project management capabilities, we understand the critical importance of time, cost, and quality to overall project success, and pride ourselves on consistently delivering on our commitments.

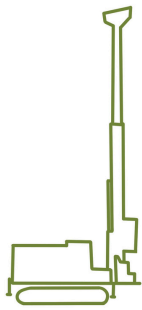

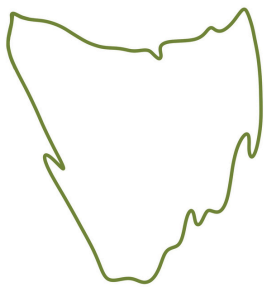

From large-scale developments to bespoke investigations, we work closely with our clients on project requirements, ensuring high quality results and maximum sample recovery.

Based in the greater Hobart area, we provide services statewide, including Flinders and King Islands.

### YOUR RELIABLE DRILLING PARTNER IN TASMANIA

**PROUDLY  
TASMANIAN  
OWNED &  
OPERATED**

## EXPERIENCED & PROFESSIONAL DRILLERS

Our skilled team have over 40 years combined experience in the drilling industry. We understand the complexities of subsoil investigations in Tasmania and are committed to providing innovative and custom solutions to deliver results.

With extensive knowledge and experience we are equipped to complete a wide range of investigations including; dam embankments, tailings dams, bridge abutments, landslips, roadways, ports, wharves, communication towers, and over water from a barge.

Drilling Dynamics also have Class 2 licenced drillers to install and decommission wells and bores in accordance with the Minimum Construction Requirements for Water Bores in Australia.

## GEOTECHNICAL & ENVIRONMENTAL DRILLING SERVICES

Drilling Dynamics offer a comprehensive range of geotechnical and environmental drilling services, utilising our brand-new equipment:

- Wireline Diamond Coring
- Hollow Flight Auger Drilling
- Rotary Air Drilling
- Wash Boring (HWT Casing Advancing)
- Concrete Coring
- Split Spoon & Standard Penetration Test (SPT)
- U63 Push Tubes
- Hydraulic Packer Testing
- Installation of Groundwater Monitoring Wells
- Decommissioning Wells & Bores
- Soil and Gas Vapour Well Installation
- Vapour Pin Installations
- Installation of Vibrating Wire Piezometers & Inclinometers
