

Services and Solutions

Over 30 years experience providing quality network transport systems

OVERVIEW

Southwest Networks Inc. (SWN) was founded in 1995 and has provided structured cabling design/build and installation services for over 30 years.

WHY SWN?

SWN is a seasoned services provider and loyal strategic business partner.

SWN operates two in-house divisions to provide complete installation and maintenance for all low-voltage cabling installation needs.

Our Project Performance Division designs, installs and supports large Data, AV and Security cabling projects.

Our Maintenance and Service Division operates a flexible and responsive Service Fleet, with fully-equipped vehicles offering standard response and emergency response to handle mission critical requests.

SWN supports customers throughout Texas and nationwide to provide consistency and quality installation services.
