

ONBOARD OXYGEN CLASSROOM

We are classically trained  thinkers.

TALKING TRUST

A one-day interactive learning experience designed to generate new thinking and leadership accountability around trust.

ONBOARD OXYGEN CLASSROOM

Master storytellers with pixie dust and passion.

We make no bones about it.

Everyone who works with ONBOARD OXYGEN Classroom comes with Disney DNA. Our facilitators are simply the best.

Many of us have worked for other legendary companies in a variety of industries including sports management, the non-profit sector, government, manufacturing and healthcare. Each partner brings a unique set of facilitative talents to the table.

Yes it all started with a mouse, but we've also cultivated seasoned portfolios of practice, evidence and skill, which allows us to holistically develop and implement the best learning for you.

TALKING TRUST

Is a classroom driven, 1 day interactive learning experience that explores the concept of trust, how we approach it individually and how it affects our organizations.

Most importantly, participants will understand what their role is as a leader in creating an environment where people feel safe, motivated and engaged to perform to the best of their ability - trust is that fuel.

This program includes a series of activities, reflective learning, application and adaptation designed to prepare leaders to take knowledge back to the front line.
