

Online Courses

At Engreco Healthcare, we offer a range of maxillofacial prosthetics courses, delivered in-person at our education centre in Leighton Buzzard, UK, and through flexible online learning. Led by award-winning maxillofacial prosthetists, our courses are designed for clinicians, dental technicians, maxillofacial prosthetists, prosthetics and art students seeking to advance their skills in maxillofacial prosthetics.

Our online courses are designed as comprehensive, self-taught learning experience, allowing participants to develop practical prosthetic skills with confidence from their own workspace. They are structured to provide clarity, flexibility, and real-world applicability, making them suitable for focused independent learning while maintaining the depth and standards expected in prosthetic practice.

What to expect

Each participant will receive a complete course pack containing all necessary resources to complete their prosthesis, from start to finish. This includes:

- Materials
- Booklet
- Step-by-step guide
- Video demonstrating each stage
- Online face-to-face catch up
- Certificate of completion
- Complete on your own time
