

The EDGE actuators are designed for web and strip guiding.

Features:

- ✓ DC servo motor (brushless) with onboard controller.
- ✓ Thrust ranges from 150 to 1,000 ft-lbs. of thrust.
- ✓ Programmable strokes up to 12".
- ✓ Absolute encoder, no homing sequence required.
- ✓ Smaller foot print than traditional actuators from guiding suppliers.
- ✓ Linear motion is produced through ball screw linear actuator.
- ✓ Low maintenance.
- ✓ High duty cycle.
- ✓ Available with holding brake.
- ✓ Multiple mounting configurations.
- ✓ Use the EDGE controller to power and operate these actuators.
