

FOCUS ON: Collagène

Marine Sourced Collagen

The following results were acquired during a Focus Study conducted by THREE International from May 8, 2024 – June 28, 2024. 20 Volunteer participants took a 10-day cycle of Collagène for 2 consecutive months. Here's what they had to say:

"It feels like there is a bit of tightening up and smoothing under my eyes!"

"My hair looks and feels so healthy"

"I noticed my skin looked more smooth yesterday morning. Love it."

"My nails look great!"

"My eyelashes have grown longer than ever before."

"My eyelashes look better than they ever have before."

"Softer feeling skin."

"I've noticed my skin feels so much better. I don't think I need as much moisturizer and it just feels smoother."

"I love it! I feel like my hair, skin and nails are healthy!"

Over 50% reported brighter looking skin.

70% noticed a more even skin tone.

40% saw a reduced look in fine lines.

45% felt like their hair seemed healthier.

Over 60% noticed healthier feeling hair.

80% noticed a reduced look in fine lines.

More than 50% of participants saw a reduced look in dark under-eye circles and felt like their skin was smoother.

In a previous study, we found that Collagène is absorbed at a **73% higher rate** than the average control molecule thanks to our advanced cellular absorption technologies.

99%

Would "Absolutely" recommend
Collagène to a friend!
