

Protect Your Cloud. Protect Your People.

Cybersecurity Solutions for Microsoft 365 E5

Most Microsoft licenses include access to some of the industry's top cybersecurity tools and capabilities. Unfortunately, too many organizations lack the skills on-hand to properly configure these tools and secure their cloud environment. By providing the Microsoft and cybersecurity expertise to leverage Microsoft 365's powerful security tools, Ardalyst can help get you ahead of your attackers while enabling productivity, enhancing resiliency, and most importantly, protecting your data.

Cloud Security from Microsoft Defender

The Microsoft 365 E5 license offers several Microsoft Defender products that combine to provide a comprehensive defense for your organization. We work with you to understand your business needs and your unique environment to configure these tools to not only enhance your productivity but also improve your ability to prevent, detect, investigate, and response to attacks across key focus areas.

Active Directory Protection Defender for Identity

Monitor user behavior and identify attacks

Endpoint Protection Defender for Endpoint

Reduce your attack surface and improve detection and response

Cloud Access Management Defender for Cloud Apps

Cloud Access Security Broker (CASB)

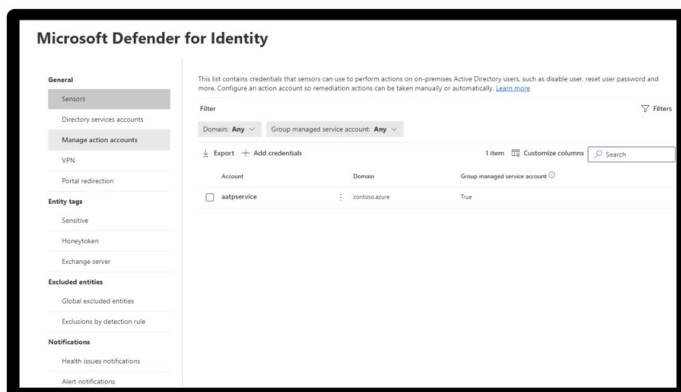

Data Loss Prevention Defender for Office 365

Protect your data and improve threat prevention

What We Do

Active Directory Protection

Microsoft Defender for Identity

Properly Configure Active Directory

Configure Microsoft Defender to detect compromises to your network and identify protective actions

Contain Attack & Lateral Movement

Setup Multi-Factor Authentication and other conditional access controls to identify unusual activity and take action to address threats before they spread

Secure On-Prem Active Directory

Arrange on-prem Active Directory services to leverage Defender for Identity and other cloud providers to use Azure AD to authenticate users for protection across your entire network

Endpoint Protection

Microsoft Defender for Endpoint

Endpoint Onboarding

Onboard all managed endpoints and configure the necessary capabilities within your Microsoft Defender for Endpoint

Endpoint Security Reporting

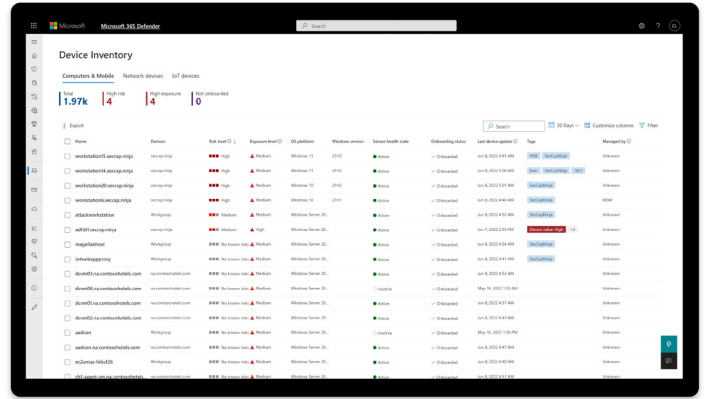

Integrate endpoint data into the Azure Sentinel SIEM to leverage Azure Monitor Workbooks to help you better monitor and visualize your data

Incorporate Threat Intelligence

Incorporate Mandiant Advantage Threat Intelligence into Azure Sentinel to inform your security operations and improve your response

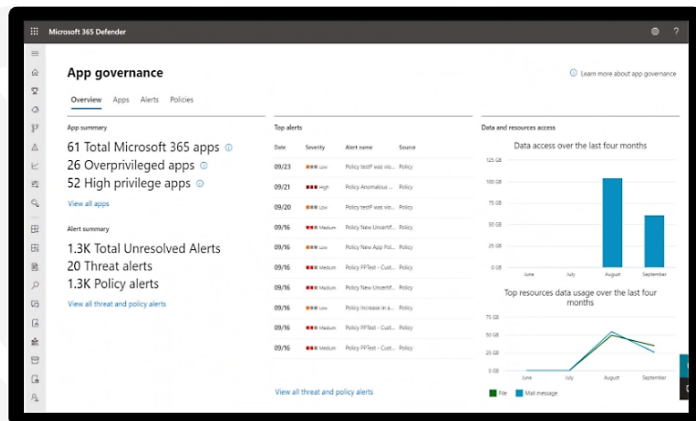

Manage Vulnerabilities

Automate Microsoft Defender for Endpoint to identify vulnerabilities and immediately eliminate any threats to your network.

Cloud Access Management

Microsoft Defender for Cloud Apps

Configure Cloud Access Security

Configure the CASB to identify policy enforcement actions needed around Information protection, Threat, and Compliance

Establish Secure Connections

Setup your MS CASB to broker interactions and protect against security risks between enterprise users and cloud service providers

Integrate Azure Sentinel

Ingest information into Azure Sentinel, customize workbooks, establish playbooks built to your specific business needs

Data Loss Prevention

Microsoft Defender for Office 365

Data Labeling & Rule Setting

Use both AIP and DLP's labeling to help protect against potential breach and improve your overall security posture

Insider Threat Assistance

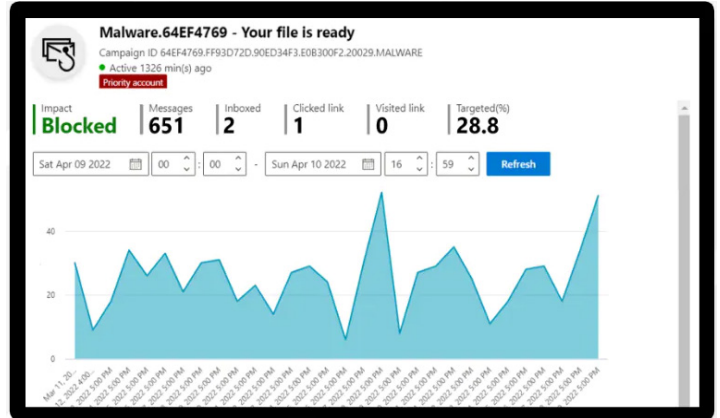

Integrate endpoint data into the Azure Sentinel SIEM to leverage Azure Monitor Workbooks to help you better monitor and visualize your data

Setup Alerts & Policies

Extend your security coverage and immediately boost your default protection, as well as provide Safelinks and Attachment protection

Identify Mass Downloads or Uploads

Configure your SharePoint audit settings to produce detailed audit logs to better track data movement and identify potential threats

Why Ardalyst

Big Solutions, Small Business

Ardalyst is a small business that has perfected being and nimble and fast to meet our customers needs. You're more than a number and your Microsoft team is always just call or email away.

Nobody Better

Our team has rolled out one of the largest Microsoft 365 implementations in the world. You won't find anybody better to handle your Microsoft implementations both big and small.
