

ET's PELLETS

Enviro-Tech Pellets work on the bottom, so you won't have to!

All new value-added sludge control bacteria pellets, Enviro-Tech Pellets, were designed to fit a need in the lake and pond market as a low-maintenance solution for sludge bed removal and beach clean-up.

Enviro-Tech Pellets are fortified with specialized bacterial strains that are high volume waste consumers of muck and organic matter. These pellets have a broad trace mineral base and an organic catalyst to increase the productivity of the beneficial bacteria in each pellet. The pellet itself was specially designed to drive the active ingredients down to the sludge so the dose isn't consumed by the water column.

Enviro-Tech Pellets combination of natural technologies is a simple cost-effective method for continuous sludge management.

- Biodegradable pellets
- Contains sludge-eating bacteria, enzymes and trace minerals
- Reduces sludge bed without the use of heavy equipment.

Application Rate:

Usage: 125# per surface acre (3.0# per 1000 sq ft)
Broadcast pellets uniformly over surface; Use 2 - 4 times per year.

For Optimal Results:

- Use as directed
- Apply when ambient temperature is 50° - 90° F; dissolved oxygen level is over 1.0 ppm;pH is 6 - 8; alkalinity is less than 100 ppm
- Use with our Enzymes, Bacteria, and Phosphorous Reduction products for a full treatment program
- Proper aeration will enhance product performance
