## PD Plus - The Ultimate Degreaser

All-purpose, low cost and environmentally green lift station degreaser

**PD Plus – The Ultimate Degreaser** is an all-natural mineral blend which is non-toxic to both human and microbial life. Our products are pH-neutral, non-corrosive, and bio-inert.

**PD Plus – The Ultimate Degreaser** functions as a general use, lift station degreaser with many benefits:

- Disperses Grease and loosens mats
- Preconditions influent
- Reduces odors
- Maintains microbial health
- Loosens inner surface build-up through its “micro-abrasion” properties
- Control the buildup of F.O.G. (Fat, Oil, and Grease) and toxic gas generation
- Odorant molecules are entrapped within the slurry-like dispersion formed by the addition of PD Plus and water

Easy to use

Only requires water

100% Safe and Non-Toxic

Recommended dosage:

Initial “shock” dose of 2-3 buckets

Maintenance dose of 1-2 buckets per lift station every 2-3 weeks

According to the EPA, 56% of SSOs (Sanitary Sewer Overflows) are grease related!

Water that goes down the kitchen drain doesn't disappear! It travels through the sewer system to the wastewater treatment plant to be processed.

**Over time residual grease and oils can build up and clog pipes.**

*Clogged pipes lead to costly overflows, causing damage to structures and the environment!*

This is an example of how **PD Plus – The Ultimate Degreaser** can keep pipes clear by managing F.O.G. in lift stations.
