

SYNERGY

Synergy (from the [Greek](#) *syn-ergo, συνεργός* meaning working together) is the interaction of two or more things so that their combined effect is greater than the sum of their individual.

Synergy is the most potent high performance enzyme for water clarity.

Synergy is specifically designed for use with Enviro-Tech's PX-700®, other biological products, and detergents. Enviro-Tech's Synergy enzyme technology yields over six thousand identifiable enzymes, coenzymes, amino acids, and other proteins and is derived from a proprietary fermentation process.

Enviro-Tech's Synergy works efficiently and successfully on a broad range of organic constituents. Synergy goes to work immediately and safely. If other products such as bacteria are needed, normally the dose rate is 50% less which tends to be more cost effective.

Benefits of ET's Synergy:

- Natural organic product
- Renewable resource
- Naturally reduces odors
- Fast Results
- Reduces Fats, Oils, and Grease
- Reduces Odor
- Proven Field Results
- Non-toxic, non-corrosive natural organic product
- Designed to work with all of ET's

- WASTEWATER TREATMENT PLANT • LAKES AND PONDS •

- OIL SPILL CLEANUP • LAUNDRY WASTEWATER •

Specifications:

Form:	Free Flowing Liquid
Color:	Translucent, Orange-Brown
ph Range:	3.25 - 4.95
Weight:	8.3 8.4 lb./gallon

Directions for use:

Synergy is a mega concentrate and can be diluted from 2oz per gallon to 16oz per gallon for most odors and remediation. For severe remediation, add three to six parts per million.

Places to use:

- Municipal Waste Water Treatment Plants
- Commercial and Industrial Waste Water
- Industrial Laundry Wastewater
- Lift Stations
- Lakes and Ponds
- Sludge Processing
- Agricultural and Food Processing
