TRIPLE PUNCH DEGREASER

Triple Punch Lift Station Degreaser is a revolutionary natural dispersant that breaks organic and hydrocarbons to a minute particle that indigenous organisms can remediate.

Triple Punch Lift Station Degreaser also contains orange scent that utilities rely on to decrease wastewater odors during warmer months.

DOES NOT USE DI-LIMEONENE

BIO BLOCKS

Enviro Blocks are high count bacteria laden solid. Enviro-LS Blocks are used in degrading organic waste in higher flow systems such as lift stations, wet wells, etc. Enviro-GT Blocks are used in high temperature applications such as grease traps. Each product will gradually dissolve over a 30 - 120 day period which allows for continuous treatment and degradation of waste.

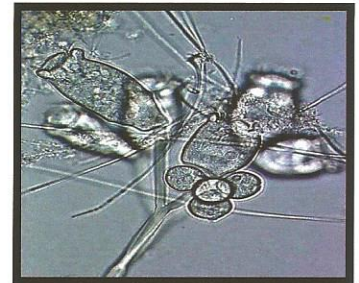

V-ZYME LIQUID

V-Zyme Liquid is "ready to work" vegetative microbes with 1.8 trillion microbes per gallon and 30 bacteria strains. V-Zyme Liquid out performs all liquid microbes in the industry. If you need fast results, use V-Zyme.

V-Zyme Liquid eliminates pass through compounds, eliminates odors, and reduces BOD, COD, and TSS in final effluent.

V-ZYME POWDER

V-Zyme Powder (like the liquid) is used when immediate remediation is needed. V-Zyme has 37 strains of biomasses collected worldwide.

V-Zyme Powder activates **immediately**.

V-Zyme Powder can survive and function at acidic levels of pH 4 to alkaline levels of pH 11 without adjustment.
