

# EMERGENCY DEPARTMENT

VS.

# IMMEDIATE CARE CENTER

Where to seek care for injuries and illnesses

## CALL 9-1-1 IF YOU'RE EXPERIENCING A MEDICAL EMERGENCY, SUCH AS:

- + **Severe bleeding**
- + **Severe chest pain** or shortness of breath
- + **Severe injury**
- + **Heart attack symptoms:** severe chest pain with nausea, shortness of breath, dizziness, fatigue or cold sweat
- + **Symptoms of stroke:** Facial drooping, arm weakness or speech difficulties
- + **Feeling faint**
- + **Impaired vision**

## HAVE SOMEONE DRIVE YOU TO THE ED FOR EMERGENCY SITUATIONS LIKE:

- Head injuries with loss of consciousness or seizures
- Abdominal pain that doesn't go away after a few hours
- Seizure
- Heart attack or stroke symptoms
- Amputations, deep wounds or severe burns
- Poisoning or overdose
- Severe allergic reaction
- Persistent head pain
- Altered mental state
- Vaginal bleeding with pregnancy
- Fever with a rash
- Multiple injuries
- Physical or sexual assault
- Suicidal behavior

## VISIT AN IMMEDIATE CARE CENTER FOR:

- Cold and flu symptoms
- Asthma
- Broken bones and dislocated joints
- Minor cuts, sprains and burns
- Pink eye
- Persistent diarrhea or profuse vomiting
- Animal bites or insect stings
- Urinary tract infections
- Skin problems
- Foreign objects in the eyes, nose or ears
- Earache
- Fever without a rash
- Dehydration
- Tetanus shots
- Back or joint pain
