JCB

100% electric. Zero emissions.

JCB is leading the way in clean technology and reducing harmful emissions. That's why we are introducing JCB E-TECH, a new generation of electric products with zero emissions at point of use that don't compromise on performance. JCB's pioneering power packs are the first in a range of energy storage solutions with zero emissions, less noise and no compromise on performance to provide power wherever and whenever you need it.

ZERO EMISSIONS.

JCB's clean technology electric power packs have zero emissions at point of use, making them safe for any environment.

ZERO COMPROMISE.

By using the most energy dense Lithium-Ion technology, JCB electric power packs provide the maximum available power in the smallest package.

LOW NOISE.

With no engine, the JCB power packs offer near silent operation on site, creating new opportunities for noise sensitive or out-of-hours applications.

REDUCED COST.

State-of-the-art inverter technology and automotive grade Lithium-ion batteries ensure that the JCB power packs deliver maximum uptime.

BUILT TO LAST.

The JCB power packs have been designed to withstand the toughest applications, with robustness and ease of movement forefront in the design process.
