

X PRO

A SAFE & SIMPLE ACCESS SOLUTION

QUICK SPECS

The **X Pro** is a practical solution for solo working. Our patented hinge system makes it easy to transform the professional stepladder into a convenient workbench, eliminating the need for two separate products.

The solid ladder includes a large standing surface to allow a comfortable working position, while the anti-slip rungs and feet ensure secure, steady support with a standing height of 0.5m and safe working load of 150kg. As a workbench, the **X Pro** can be used both horizontally and vertically, making it a versatile solution for a wide range of activities.

Designed as a convenient solution for a single worker, the **X Pro** weighs just 10kg and is easy to transport thanks to the smooth cut carrying handle. Taking up minimal space in a van, the **X Pro** is a safe, simple product that offers flexible and secure working on any site.
