Technical Performance

Design Engineered to Last

Our tableware is materially and design engineered to last in a professional setting, from our unique clay recipe and controlled kiln environment to durable shape design and long-lasting finishes.

Raw Materials

Our raw materials are responsibly sourced and carefully selected to create a strong, long-lasting plate.

Engineered Shapes

Churchill products are engineered for professional use, with reinforced impact areas and reduced weight where possible.

Vitrification

Vitrification is essential for professional tableware, it's the process of altering the particle structure of our ceramics to create a dense and watertight body, thereby creating a stronger and more food safe ceramic product.

Glazing

Churchill ceramics are finished in a durable, scratch resistant glaze that has been specially formulated for hospitality use.

Smoke

Contemporary & Dramatic

Contemporary but refined, Alchemy Smoke provides the perfect blend of colour and white space. The minimalist wisp design features on striking Abstract shapes, creating a dramatic canvas for premium cuisines. Manufactured in Alchemy Performance Fine China, with the optimum level of added alumina for strength and the highest quality Fine China clay.

Launching in Summer 2024, Smoke is available in two neutral colourways, Black and Grey, ideal for premium food presentation.
