Dunkel	Belagua	

### 16 Tumblers & Hi Balls

Sidra	Jerte	Pinot
Aran	Victoria	Merlot
Pinta Stack	Mencia	Nervion
Chiquito	Syrah	Aiala

### 24 Cocktails & Shot Glass

Margarita	Koshu	Rome	Havana
Blue Hawaii	Mykonos	Gala	Martini
Ibiza	Monastrell	Magnum	Chupito

# Brand History

**Vicrila** is an exemplary glassware manufacturer, well-known for quality, exceptional product performance and premium service.

**Vicrila** was **founded in 1890** with a solid dedication to glass production. Since the beginning of the company, **Vicrila** has been creating glassware that redefines how the hospitality industry enjoys the finer dining service. Celebrating more than **130 years** of existence, **Vicrila** has become the most significant and oldest manufacturer of table glass in Spain.

As a company, **Vicrila's** values are a perfect fit with the market, **ensuring quality and technical performance are a priority**, but also innovation in design.

Manufacturing over 200 million glasses per year, **Vicrila** has an expansive portfolio to suit all tabletop presentations. Within the hospitality industry, product performance is essential. **Vicrila** offers a range of fully tempered glasses for those that require durability.

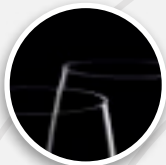

Over the years, the company received numerous awards and recognitions for its innovative management and industrial safety systems and has been awarded the **ISO 9001- ISO 14001- ISO 50001 certificates.**

**Vicrila** uses two manufacturing techniques, the **tempered and sheer rim manufacturing methods.** The tempered process is up to 5 times more resistant due to the heat treatment that cools the glass quickly to obtain this unrivalled resistance. In the event of breakage, it keeps the broken glass pieces together, ensuring the safety of users.

The sheer rim technique is a pure and clean cut with no ridge on the item's surface, enhancing the qualities of any wine or blend. It ends in a non-cutting bevelled edge.

Today, the company continues to stay true to its mission to design, industrialise and manufacture glass solutions for drinking, eating, and preserving worldwide, offering premium service and quality.

### WHAT IS TEMPERED GLASSWARE?

Tempering is a thermal process of heating a glass close to the melting point and then cooling it rapidly. This causes the outer surface of the glass to cool and shrink faster than the inside of the glass wall, creating tight skin. This closes the many hairline fractures naturally occurring in regular annealed glass and makes a vastly stronger product.

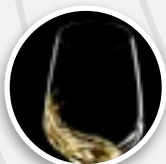

### HOW STRONG IS TEMPERED GLASS?

Tempered glass is 5 times stronger. This is known as Mechanical Shock Resistance, making a cost effective choice.

### ARE VICRILA GLASSES FULLY TEMPERED?

All glassware with a "T" placed on it is fully tempered from rim to foot, inside and out. Not all manufacturers temper to the same high standards.

### IS TEMPERED GLASSWARE MORE RESISTANT TO TEMPERATURE CHANGES?

Fully Tempered items are resistant to 135°C temperature changes. This is tested by taking an item of glass from the oven at 135°C and then plunging it into cold water. The glassware will not shatter or break.

### IS TEMPERED GLASS SAFER?

Should a glass break due to an excessive blow, it will break into small pieces, making it safer to use within the hospitality industry than non tempered glass.

### WHAT DOES SHEER RIM MEAN?

Sheer rim glasses feature a refined and beadless edge, which has been produced to give optimal contact with the mouth, enabling a superior drinking experience.

Dishwasher Safe

# Manufacturing Excellence

## RIM-TO-FOOT TEMPERED

Fully tempered glasses are resistant to mechanical shocks, extending the life of the product by five times, compared with non-tempered glass.

## SAFETY

Should a glass break due to an excessive blow, a tempered glass will break into small pieces, making it safer to use within the hospitality industry than non-tempered glass.

## DISHWASHER SAFE

Strong and durable, shock tested and capable of industrial dishwasher cycles while maintaining clarity.

## HEAT-RESISTANT

Thermal shock tested and resistant to 135°C and can withstand changes in temperature from hot to cold.

## SEAMLESS FLAME-POLISHED STEM

No seam between the bowl and stem, ensuring a more enjoyable drinking experience and an aesthetically pleasing glass.
