## Biographies

**Sarah Bulger.** Sarah graduated from ODU in December of 2019 with a bachelor's in Art History. She is currently at UNC-Chapel Hill working on a master's in Library Science.

**Danielle Goldstein.** Danielle graduated from Old Dominion University in May 2020. She majored in English with a concentration in Linguistics and minored in African American Studies. She is now enrolled in ODU's Graduate Program in the Institute for the Humanities in which her concentration is in Cultural Studies. Her research for the "Ideological Analysis of *Get Out*" was done for an assignment in a course called "Language, Gender, and Power." Danielle benefited from this research by naming and describing ideologies that were presented in the film in order to make racist ideologies more visible. She notes that ideologies tend to work best in the world when they are *not* named.

**Kirstine Huey.** Kristine graduated from the Old Dominion School of Nursing in May 2020 with her BSN and earned her license in June 2020. Currently, she is continuing her active duty service as a Nurse Corps Officer in the United States Navy. Prior to graduating from ODU with my BSN, her background was in electronics and aviation maintenance. Kristine believes undergraduate research will benefit her as a new nursing graduate because she can apply critical thinking skills and deductive reasoning into the clinical and community health settings.

**Joana San Luis.** Joana is an alumni from Old Dominion University's School of Nursing. She graduated in May of 2020 and currently works in a Level 1 Trauma Hospital as an operating room (OR) nurse. This research allowed her to understand how a patient's health condition may have been due to a lack of access to nutritious foods. Her hope for the study is to help prevent food insecure individuals from having their health deteriorate to the point of requiring surgery.

**Mia Mitnaul.** Mia attended Old Dominion University where she received her BSN in Nursing during the spring of 2020. Since then she has accepted a position at a local hospital as an RN and continues to prepare for her state board certification exam. Her undergrad research has provided numerous opportunities such as understanding the importance of community/public advocacy and developing transferable skills that aide in academic and professional development.

**Antionette Riverea.** Antionette graduated from Old Dominion University in May 2020 with a Bachelor's of Science in Nursing. She is currently working as a Stepdown/Intermediate Care nurse at Sentara Obici Hospital. From the research she conducted with her fellow nursing students, she was able to get a better understanding of the community within the nursing field. She also discovered areas where she could educate to her patients.

**Sherelle Rodgers.** Sherelle graduated with her BA in History in spring of 2020. She is now furthering her academic career at George Mason University with hopes to receive her MA in History by fall of 2021. She found that her undergraduate research experience was a rejuvenating process that helped her find her passion.

**Daniel Singh.** Daniel graduated from Old Dominion University spring of 2020. He is currently a volunteer EMT for the city of Virginia Beach as well as studying for his MCAT to apply to medical school in 2022. He has benefited from his undergraduate research immensely by gaining knowledge on how information can be interpreted and used to hypothesize future possibilities.
