### New Children's Book, "zigglebee" Make its Official Debut!

**BALTIMORE, MD** (July 1, 2022)- Today is the official launch of the children's book zigglebee and it is available for purchase via Amazon as well as [www.zigglebee.com](http://www.zigglebee.com). This book was designed by Lana and inspired by Laila's Gift to encourage engagement through creativity and the arts. This book is a testament that no matter what challenges we face, art is a universal way to communicate and motivate creative thinking. Imagination is an important concept for children to tap into. It helps them to express their thoughts, feelings, and perception of their reality. The blank canvas in this book, along with Lana's storytelling will enable kids all over the world to connect, and communicate through art, and their reality.

**About The Author**-Lana and Laila are twin sisters. They were born on September 5, 2014 in Baltimore Maryland. Laila was born with a condition called Jacobsen Syndrome. This condition causes Laila to have developmental delays which impair her ability to eat, talk, walk, and interact with other people...including her twin sister, Lana. Lana has discovered she can connect with Laila through imagery and storytelling through zigglebee. A big part of the zigglebee movement is to also bring awareness and be a voice for parents/siblings of special needs children.

\*A percentage of proceeds from each book will go towards research for Jacobsen Syndrome.
