

Biochemistry & Proteomics

Biomarker identification, and protein interaction studies

- Protein profiling, enzyme assays, biomarker identification and protein interaction studies.

Genomics & Metabolomics

In-vivo efficacy, safety, and toxicity studies for transtational research

Cutting-Edge

Infrastructure - Equip^{ed} with modern instrumentation and high-throughput platforms.

Fermentation Technology

Strain development, pioprocess optimization, and scale-up solutions

Coilorative Approach -

Tailored solutions for academia, biotech, pharma, and industry partners.

Phytochemical Extraction.

Standardized extraction. bioactivity screening, and natural product discovery

OUR EXPERT SERVICE DOMAINS

Microbiology

Cell biology

Molecular biology

Animal & preclinical studies

Bioinformatics

Scientific containment/willing

Microbiology

Phytochemical extraction

Scientific extraction

Customized studies

Customized studies
