

COMPANY CHALLENGES: Supply Chain, Vendor Management, TPRM, and Logistics

- Start-up / Early stage Supply Chain (SC), Vendor Management (VM) strategy, initiation, charter, scope, promotion, and leadership buy-in.
- Ineffective SC, VM compliance with industry best practices, import/export, regulations, or contractual obligations.
- Lacking SC, VM due diligence during Mergers & Acquisitions, Reorganization, Private to Public transformation, Pre and Post Acquisition alignment.
- Lacking unified and enterprise-wide SC and VM methodologies.
- Grappling with siloed SC and VM competencies, varying among business units – requiring unity and alignment.
- SC & VM detachment from Technology, Business, Sponsors, Vital Business Units, and other stakeholders.
- Missing out on Technological Advances in SC, VM, logistics tools, Analytics, and Digital Transformation.
- Conflicting SC, VM, TPRM, and Logics being used, lacking integration.
- Inadequate or delayed alerts regarding SC and VM impacts – polycrisis events.
